

MOTION

I MOVE that the matter of the HOMELESSNESS AND POVERTY COMMITTEE REPORT relative to the City's Comprehensive Homeless Strategy, Item No. 6 on today's Council agenda (CF#15-1138-S1), BE AMENDED to:

1. Add to Strategy 4A – Strengthen CES Technology, Staffing & Standardization an instruction to LAHSA to include in their quarterly reports information on the number of outreach attempts made per individual and how many were ultimately successful. LAHSA should also report on how they keep records of individuals who refuse services in order to keep population and location information current.
2. Add to Strategy 4B – Strengthen Departmental Support for Homeless Case Managers an instruction to listed City departments to report to Council on how they will support this recommendation while ensuring that there is no reduction or negative impact in the core service provision to the originally intended clients of the facilities (e.g. children, youth or seniors at a park or library).
3. Add to Strategy 4D – Discharge Data Tracking System & Planning Guidelines the following instructions to LAHSA:
 - Report on how they will ensure that the development and implementation of discharge plans will prevent the funneling of individuals into targeted geographies;
 - Report on funding available to assist individuals who desire to return to their home City or State, and include that voluntary component as an element of discharge planning guidelines.
