

M1

TO CITY CLERK FOR PLACEMENT ON NEXT  
REGULAR COUNCIL AGENDA TO BE POSTED #51

MOTION

I MOVE that the Department of Building and Safety be authorized to send staff to travel to Arizona for the purpose of inspecting and certifying the manufacturing plants of firms that fabricate building components (structural steel, prefabricated concrete, truss systems, etc.) for projects that are being built, or will be built, in the City of Los Angeles, inasmuch as this inspection and certification process is required by City Code before building material fabricators can sell their products to builders in Los Angeles to ensure that buildings built in the City are built with only the highest quality fabricated components, and without this inspection and certification, most, if not all, major building projects in Los Angeles could be halted or delayed since much of the building materials used in the Los Angeles building industry are manufactured in Arizona.
