Summary: In 2017, Los Angeles initiated a 100% Renewable Energy Study. However, none of the current scenarios proposed in the study consider a pathway to 100% renewable energy by 2030. At the same time, the scenarios leave the door open to a number of dirty energy sources. Given the city's recent declaration of a "climate emergency", we call on the Mayor Garcetti, the Los Angeles City Council and LADWP to study a 100% real, clean energy by 2030 scenario that excludes methane, biomass, biogas, nuclear energy, and unbundled renewable energy credits. Discussion and vote by the Hermon Neighborhood Council in support of filing a CIS to Los Angeles City Council File 16-0243 and to the LADWP Board of Commissioners, calling on LADWP to adopt a 100% real, clean energy by 2030 scenario as part of its ongoing 100% Renewable Study, one which excludes dirty and dangerous fuels such as methane, biomass, biogas, nuclear energy, or unbundled renewable energy credits. The Hermon Neighborhood Council resolves to call on Los Angeles Mayor Eric Garcetti, the Los Angeles City Council, and t he Los Angeles Department of Water and Power (LADWP) to study a 100% real, clean energy by 2030 scenario that excludes methane, biomass, biogas, nuclear energy, and unbundled renewable energy credits.
