To all Councilmembers and their staffs

In regards to Council File 16-0243, I would like to request in the strongest terms that any mandate given the LADWP to achieve a 100 percent renewable energy portfolio for the City require that ALL parties concerned be instructed that NO use be made of gas – natural, fracked or otherwise – or other 'transitional' fossil fuel.

Given the danger of climate change, the losses suffered by Angelenos in the Aliso Canyon leak, the increasingly obvious dangers of fracking, this should be a no-brainer but fossil fuel industry 'experts' insist on promoting 'safe, natural gas' and 'clean coal'.

Don't be fooled. Protect your constituents and insist the City move directly to 100% renewables – primarily solar, wind and tidal. And give them a challenge – do it faster, do it better. For us. For our children.

Thank you for your attention to this.
