Dear Mr. Ryu,

Please do not act on Council File **CF-16-0461** tomorrow. The entire idea has no long range thinking in mind for our city, its planning, and the preservation of our environment which already has numerous issues to solve. I've read numerous articles, but the one that sticks in my thoughts was this one by Casey Maddren.

If you haven't seen it, you might want to give it a few minutes.

We Need Trees, Not Fees

<http://citywatchla.com/index.php/los-angeles/15406-we-need-trees-not-fees>

Thank you,

Robert Schwartz

To Councilman Blumenfield:

Sir:
It is a terrible idea to pay developers to remove mature trees and to have them replaced with saplings. Not only do the trees remove harmful gases from the atmosphere they provide desperately needed shade and homes for birds and animals and yes bees. If we continue to destroy what is needed for life to survive there will be nothing left on our planet. We will be come like so many other countries that do not appreciate what they have and continually destroy. I have a friend who lives in Panama and showed me pictures of the destruction that happens on a daily basis. There is no respect for anything of historical significance, (torn down). trees (cut down) and all birds and animals that live in them destroyed. I moved into my home in 1972. There have been numerous trees cut down, some needed to be removed and others just plain removed. Nothing was ever planted to replace the removed trees as is supposed to be. Don't let Los Angeles be destroyed.
Thank You.
