Dear Sharon,

The quality of life and health of the residents of Brentwood who live near Sunset and San Vicente is being negatively affected by the ongoing added traffic congestion from all the continuous construction projects and school expansions being approved by the city and Mike Bonin. From 3PM until almost 7 PM weekdays traffic gridlock makes it is impossible for Brentwood residents who have a medical emergency that requires a Class 1 trauma center to get the care they need in a timely manner. UCLA and Cedar Sinai hospitals are the only two hospitals in our area that are Class 1 trauma centers. Santa Monica and Saint Johns Hospitals are not Class 1 trauma centers. Because they are not Class 1 trauma centers they are not required like UCLA and Cedars to have Physicians and Surgeons present 24/7 in the ER who deal with critical time sensitive life and death emergencies. Please stop approving new construction that is based on false and misleading EIR. Come to Sunset and Barrington or Sunset and Kenter or Sunset and Bristol during the week when school is in session. Watch the complete traffic gridlock in Brentwood from 7:30-8:45 AM and from 3-6:30 PM. After watching ask yourself how it would be possible that additional construction would not negatively affect gridlock and the quality of life and health of Brentwood residents. Please stop additional traffic construction and congestion in Brentwood. Please require real and objective EIR's that adequately reflect weekday traffic gridlock.

Thank you,
L Swerdlow
