Hello! I am writing to ask that you show support for the restoration of the South Central Farm.

It is extremely important for this land to be re-instated to the community as there are so many possibilities for this land.

Some possibilities are a food hub, garden space, recreation area, cultural center or even an environmental justice museum.

The benefits would include sustainable job creation, improved public health and nutrition, community benefits, lowered rates of violence, climate change mitigation, biodiversity, culturally appropriate food and an example of environmental justice.

Thank you for your time and it is the right moment to return this land to the community.

My name is Emma, Mar Vista 90066.
Thank you!
