I am a home owner for sixteen years west of Westwood Blvd and have only seen massive over development hurting my neighborhood. The only people who are truly profiting from allowing larger build-outs in these once lovely neighborhoods are developers and mortgage brokers. My property values are being diminished by the ongoing uglification of overly large monster buildings destroying the once charming character of my neighborhood. We don't want or need building codes that will lure more obnoxious development to these areas. Keep restrictions in place. Records show the truth, that property values have continued to rise without increasing the size allowance for development. Please, stop this uglification and profiteering that ignores the reason why people choose to live here in the first place! Thanks for sharing this message with others and for serious consideration,
Greenfield Ave.
