Dear Clare,

I live at 2121 E. 7th Place -- a stone's throw from this toxic mess. I have a 7 month old baby. If these toxins become airborne he runs the risk of getting very sick, as do all of the people here in our building. It's imperative that these developers CLEAN UP THE CONTAMINATION BEFORE BUILDING. Otherwise there will be many sick people on their hands.

We manage the 7+Bridge community, a 73 unit complex of approx 175 - 200 tenants including the restaurant Bestia one block away from this very dangerous toxic site. The potential health hazard has been a very real concern for our tenants - Demand an environmental impact report before any clean up, removal of soil etc. Development of this site cannot commence until the site is legally compliant. Please be responsible to the Arts District, don't sacrifice the health of all of us who live and work here to appease unconscionable development in the District -  
Do the right thing ! Clean up this toxic mess -

As a long time resident of the downtown Arts District, I am deeply concerned that this project will cause severe health risks to the entire neighborhood (and city). I urge you to consider all the impacts to our natural environment and honor your commitment to advocate for and protect the general health and wellbeing of the citizens of LA, who would be left vulnerable and exposed to carcinogenic airborne chemicals and contaminated tap water.

As a local business owner and as a local resident, I personally will be affected by this if no action of clean up is taken care of. I have a seven month old baby and we live within view of this site. If no action is taken by this developer and if there is no enforcement by officials such as yourself our health will be affected negatively.
