Dear Decision Makers:

In anticipation of the proposed 7 story homeless accomodations (check code), I would suggest putting moms/children there because of the plethora of schools in the neighborhood and they would be safe. This area is designated horse property and seems calm overall. Residents are afraid that the peace will be disrupted but that would not be the case with that population (we hope.)

Please don't give us the homeless that make problems under the freeway or walk to the parks and 7-Elevens to set up shop. In other words, the crazies from the Sepulveda Basin. We have a hugh potential campground here called the Santa Susana State Park (fire danger).

The president suggested a federal reserve in Hawthorne. If you could put the mentally ill there along with a few mental health professionals even just home health aides, we could undue the damage of the Reagan admin who shut down the mental health facility in Camarillo when he was governor. Mental health needs to make a come-back!

Thanks for your consideration,

E.Mason
