**Council File No:** 17-0117

**Comments for Public Posting:** The extraordinary density of alcohol outlets in Los Angeles is having a negative impact on the safety of our neighborhoods. This motion asks for a simple report back on the feasibility of legislation that could help with the problem. Despite hundreds of public comments and the support from NCs across the City, the motion is being ignored. Does City Council care about one of the City's biggest contributors to crime, drunk driving and other harms? It would seem not. We are here in big numbers today to demand ARUS be agendaized. Respect the democratic process and listen to your constituents. Agendaize the motion before it expires Jan 31.
