

MOTION

In January 2017, a water service leak near 13319 Mulholland Drive within Council District 4 caused rapid mass erosion to the slope adjacent to Mulholland Drive. The slope required immediate repair to protect the integrity of the roadway in this hillside area. At Los Angeles Department of Water and Power's (LADWP) request, the Los Angeles Bureau of Engineering (BOE) is assisting LADWP in completion of the Mulholland Drive (13319) Bulkhead Construction Project (Project). BOE is providing damage assessment, engineering design, and construction using BOE's contractor to complete the Project.

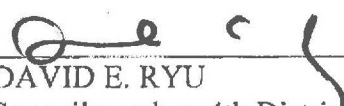

On April 27, 2018, Council authorized BOE to accept \$304,000 from LADWP to fully reimburse City staff costs directly associated with the water service leak, as well as the total cost for the Project (C.F. 17-0703-S1).

However, recent heavy rains have exacerbated the slope damage and resulted in an increase to the Project costs. BOE will require an additional \$50,000 to complete the Project. LADWP has agreed to transfer funds in advance of the Project completion to pay for the increased costs. Upon completion and acceptance of the Project, any surplus amount remaining for the Project will be reimbursed to LADWP.

I THEREFORE MOVE that the City Council, subject to the approval of the Mayor AUTHORIZE the Bureau of Engineering (BOE) to accept and deposit \$50,000 from the Los Angeles Department of Water and Power into the Engineering Special Services Fund No. 682, Department 50, Appropriation Unit No. 50PVDD entitled "Mulholland Drive (13319) Bulkhead – LADWP Change Order" to fund completion of the Mulholland Drive (13319) Bulkhead Construction Project.

I FURTHER MOVE that BOE be authorized to make any technical corrections or clarifications to the above instructions in order to effectuate the intent of this Motion.
