

MOTION

Currently, the Department of Transportation has a traffic plan to address impacts around Dodger Stadium during game days. Various complaints continue to be received from nearby residents due to the increase of traffic flow within residential streets, particularly during sold-out games, opening day, division championships, and world series games. These traffic problems are exacerbated by the increasing use of mobile applications, such as Waze and Google, that guide drivers away from the main roadways and onto the surrounding narrow residential streets. The development of an updated traffic plan is necessary to address the increasing traffic impacts around Dodger Stadium.

I THEREFORE MOVE that the Council instruct the Department of Transportation to develop an updated traffic plan for Dodger Stadium that: reflects the increasing use of technology applications, such as Waze and Google; updated traffic volume counts at each Stadium entry point; and the implementation of road closures, with appropriate personnel, two-hours prior to each home game, at the following locations to provide access to residents only:

- Lilac Place at Douglas Street
- Innes Avenue at Sunset Place
- Everett Street at Sunset Place
- Savoy Street at North Broadway
- Solano Avenue at North Broadway
- Casanova Street at North Broadway
- Amador Street at Jarvis Street
- Bouett Street at Solano Avenue
- North Boylston Street at Academy Road and Scott Avenue
- Jarvis Street at Academy Road from 110 Freeway
