Report from Bldg &amp; Safety..

It was determined that un-permitted construction was being performed on two properties. They have issued an Order to Comply (OTC) to the property owners of 2921 Glendower for unpermitted grading of the site and construction of retaining walls. The OTC instructs the work to be stopped as of 3:00 p.m. on 5/21/14 and for the owners to obtain the proper permits and approvals of construction work. The OTC was posted on the site and work has stopped. The compliance date for this OTC is June 2w1, 2014. They will issue another OTC to the neighbor after they secure the legal owner information. They will let us know when the second OTC will be issued.

If you need additional information, don't hesitate to call me.
