

Sanitation RecyclA report backs (CD5)

1) Include in item 4c, Environmental Benefits Dashboard:

- a. Work with the Southern California Air Quality Management District to report back on the air quality benefits from replacing diesel trucks with low emission trucks. Include scout trucks in the assessment.
- b. Work with the Department of Transportation to report back on the traffic impacts of the new system, including numbers of trucks on streets and alleyways. Include scout trucks and bins left in the street for hours as part of this assessment.
- c. Report back on the percentage increase of recycling and thereby diversion from the landfills from the new program. Broken down by waste hauler.

2) Addition to recommendation #4B, the educational component:

Report back on instituting a program with multi-benefits, such as the Cool Blocks program the City piloted last year. (In addition to waste reduction and education, the Cool Blocks program included components of energy efficiency, water conservation, emergency preparedness and community building. Work with other relevant departments to help with funding, including Department of Water & Power, Emergency Management Department and Neighborhood Empowerment. Include information about the \$150K available matching funds for Cool Blocks in the report back).
