Dear PLUM Members:

Gaming of the ordinance that allows offsite signage on construction sites has become a very popular sport in Venice, to the detriment of our public spaces. Originally the construction fences provided a rationale for temporary signage. Now the possibility of selling space for signage has become the rationale for dreaming up marginal "construction" projects in order to be allowed to erect walls to carry those signs.

Thank you for tightening up the regulations to reduce the abuse,

David Ewing

Commissioners,

I am very against the proliferation of advertising signs surrounding vacant lots, and construction sites in our city. The proposed Ordinance ,17-0893, should go a long way to correct this blight in our neighborhoods.

Please pass this Ordinance, enforce it, and give us some relief from this abuse.

Thank you,

Mindy Taylor-Ross
