Comments for Public Posting: As I'm watching the flames race up the hill at the back of Mt Lee on Saturday, November 9, 2019, I'm reminded as to why we need a route restriction for tour vans in the Hollywood Hills. Enormous volumes of tourists in open vans in a fragile eco system prone to fire and narrow mountainous roads = disaster. I can't believe we are even still having this conversation at all. The continuance that was delayed some 6 weeks ago should have been voted on already. The risks to the residents lives, their homes, and the lives of the wildlife should be enough to push this vote through. What are you waiting for? These risks don't lessen with time, they only get worse. C'mon politicians let's do this!
