Hello, i'm writing this message to urgently express my contempt for the proposed CVE program discussed in city council this Tuesday. Installing and funding a program of this manner would not only be a waste of taxpayer money, but also encourage and reinforce the already discriminatory, dismissive attitudes displayed by our higher officed public officials and implement a de facto systematic discriminatory policy, as CVE programs have been shown to operate on and embolden inaccurate methods of recognizing threats. Which can lead to further flares of unjust victimization, hostility and fear. Though i realize the timing on this message may be off, I passionately urge you to reject and fight the fuding and development of this program and others like it. Thank you, and best regards.
