Comments for Public Posting: Good afternoon, the time appears long overdue to form a committee regarding speaking with Governor Newsom to reopen our California state Psychiatric hospitals. As a Counselor in mental health, in patient Psychiatry, we are now, far too often-discharging patients To The Streets. While housing continues to be an issue in our city & county, Mental (non?) Wellness could easily account for 50% of these issues. Again, the time is long overdue, to open these state facilities for a more humane & dignified lifestyle. Thank you all.
