Council File Number: 18-0002-S106

Agenda Date:

Item Number:

Summary: The Los Feliz Neighborhood Council agrees that the Los Angeles City Council should support SB 168 which would require the California Department of Resources Recycling and Recovery (CalRecycle) to establish minimum recycled content standards by January 1, 2021 for all beverage containers generated and sold in California. It would also inherently create an in-state market for recycled beverage container materials. California's existing requirement that all glass bottles contain at least 35% recycled glass has been in place for two decades and our goal has been set to source reduce, recycle, or compost 75% of all solid waste generated by the year 2020. Sales of beverage containers in California exceed twenty four million units annually, half of which are made of plastic. Something needs to be done yesterday to deal with these containers now that China has all but stopped taking our recyclables. California should once again lead the nation on environmental issues and demand recycled beverage container materials.

COMMUNITY IMPACT STATEMENT

Council File: 18-0002-S106 - SB 168 (Wieckowski) / In-State Generated and Sold Beverage Containers / Recycled Content Requirement

-FOR-

The Los Feliz Neighborhood Council agrees that the Los Angeles City Council should support SB 168 which would require the California Department of Resources Recycling and Recovery (CalRecycle) to establish minimum recycled content standards by January 1, 2021 for all beverage containers generated and sold in California. It would also inherently create an in-state market for recycled beverage container materials.

California's existing requirement that all glass bottles contain at least 35% recycled glass has been in place for two decades and our goal has been set to source reduce, recycle, or compost 75% of all solid waste generated by the year 2020.

Sales of beverage containers in California exceed twenty four million units annually, half of which are made of plastic. Something needs to be done yesterday to deal with these containers now that China has all but stopped taking our recyclables.

California should once again lead the nation on environmental issues and demand recycled beverage container materials.
