Update to a Previous Input: No

Directed To: City Council and Committees

Council File Number: 18-0247

Agenda Date:

Item Number:

Summary: The Granada Hills South Neighborhood Council supports the motion made by Councilmembers Mike Bonin and Paul Koretz which requests the Los Angeles Department of Water and Power (DWP) model a 100% renewable energy scenario in the 2018 Integrated Resource Plan {IRP}. Given the large scope of 100% renewable energy future and the impacts renewable energy will have to clean our air, improve the health of our communities, and require investment and support from ratepayers, the 2018 IRP should be an opportunity to bring this to public discussion. Further, we support excluding biomass, biogas and nuclear energy from the model. These fuels are controversial and do less to support human health, a safe climate and environment than true clean energy alternatives such as solar, wind, geothermal and hydro. We the Stakeholders in the Granada Hills community find the DWP has failed to maintain infrastructure of the system, judiciously shepherd rates for water and power for all ratepayers in the city of Los Angeles and failed to hold itself accountable to its' own strategic plan. We demand the elected leaders of this city take appropriate action to correct these deficiencies.
