2018 Integrated Resource Plan (IRP)
Los Angeles Department of Water and Power) LADWP)
Renewable Portfolio Standard

Dear Councilmember Bonin,

And the members of the ENERGY, CLIMATE CHANGE, AND ENVIRONMENTAL JUSTICE COMMITTEE:

Councilmember Nury Martinez

Councilmember Paul Koretz

Councilmember Paul Krekorian

Councilmember Gil Cedillo

Councilmember Mitch O'Farrell

I write to strongly encourage you to support the motion to direct LADWP to study 100% renewable energy in this years Integrated Resource Plan (IRP) which will be heard in the Energy, Climate Change, and Environmental Justice Committee, tomorrow Tues, June 19.

This motion is important to move forward LA City's plan for renewable energy.

I am a constituent, resident of Los Angeles and a ratepayer of LADWP. I am deeply pleased with LA city efforts and commitment to become one of the most "green and clean" cities. This is the kind of leadership our world needs. What LA does strongly effects CA, which has its own commitment as well. I am yearning to see bold and swift action to do what we now realize is possible - clean up our dirty oil and gas energy infrastructure. It is essential to shut down fossil fuel infrastructure like the PDR gas storage facility, to get green jobs and to ensure we all get clean air, water and energy.

It is important not to give in to holding back and lagging in these efforts because of pressure from who do not see or want this vision.

I encourage you to do what is right; move forward LA City's commitment to have 100% renewable energy by starting this important LADWP study of 100% Renewable Energy in the 2018 Integrated Resource Plan (IRP).

Sincerely,
Diane Fletcher-Hoppe, Ph.D.
