Hello Adam

I have appeared before the council before to help convince the city to ban bull hooks in the circus

we were successful in ways far greater than that , although Ken Feld still has his elephants in large cement storage areas.. and this is still a huge crime against the animals.

likewise Banning fur would be another step in helping elevate the world on a more compassionate level.

People who make money on the brutality of animals will have to find other ways t o earn a living.

Plus their mentality , from the nature of that kind of control is extremely dangerous

Please do the right thing

Sincerely

Steve Stone
