My name is Nancy Soto, I was born and raised in Los Angeles, California. Currently residing at 211 s berendo street, LA, CA 90004.

I was always under the notion that Los Angeles was a very progressive city, but we are far from it. We're behind. The U.K. Is far more advanced than us and just recently San Francisco band fur again we are behind! We should be following them on this ban as well as making California a cruelty free state, banning animal testing on fellow earthlings. There is no place for fur just like there is no place for dog fighting or any other act of cruelty against animals in my city. Change is coming... It's inevitable! Please help me make this happen sooner. Ban fur from my city! Council File 18-0538
