Richard Williams,

RE: Council file No. 18-0600

I understand that the LA City Council is considering Mayor Garcetti's request to increase the budget for Vision Zero to \$91 million dollars.

Based on what was done on Venice Blvd. in Mar Vista, I have ZERO confidence that this money will be used wisely.

The road diet on Venice Blvd. has not made the boulevard any safer. Using 6 month project data from LADOT, we know that collisions per 1 million vehicle miles traveled have gone up from 3.00 pre-project to 3.22 post-project and injury collisions per 1 million vehicle miles traveled have gone up from 1.95 pre-project to 2.33 post-project.

What this lane diet has done is create numerous collateral effects, among them:

- 1) gridlock on Venice Blvd which is affecting LAFD emergency response times during peak travel hours
- 2) a serious cut through traffic problem in our neighborhoods because the traffic volume on Venice Blvd has been decreased by LADOT from 46,500 to 31,000 cars a day
- 3) small businesses are hurting because reducing the lanes by 33% - from 6 to 4 - has resulted in 33% fewer potential customers driving down Venice Blvd.

Since its implementation, traffic-related fatalities have increased under Vision Zero. I urge you to ask LADOT for an explanation why this program isn't performing to expectations before you give it more money.

I also urge you to join us in asking for the lanes to be restored on Venice Blvd.

Thank you,
Gina Sommo
