

## CHIEF FINANCIAL OFFICER'S REPORT

### **Private Sale of Los Angeles Department of Water and Power, Power System Refunding Revenue Bonds**

This report is being delivered in connection with the proposed private sale of LADWP, Power System Refunding Revenue Bonds (Bonds), pursuant to Charter Section 609.

The Financial Services Organization (FSO), along with its financial advisors and banking team members, is constantly monitoring the market looking for ways to reduce the Power System's borrowing costs. The current financial environment has offered the Power System an opportunity to refund and restructure a substantial portion of its outstanding debt to reduce annual interest costs and generate significant savings to the Power System. Recently, various financial institutions have proposed ideas for responsibly restructuring some of the Power System's debt through a refunding. In accordance with the Board-approved Debt Management Policy, FSO's goal is to achieve at least three percent present value savings of the refunded par amount for its current refundings. A current refunding is a refunding transaction that is executed 90 days before the call date of the refunded bonds.

Resolution No. 4944 will provide FSO with the flexibility to execute multiple refunding transactions (up to \$1.5 billion) that produce savings for the Power System as market conditions improve.

I have determined that a private sale of the Bonds would be of benefit to and in the financial interests of LADWP and recommend the private sale of the Bonds as provided in the attached Resolution No. 4944, for reasons including the following:

- the size of the proposed bond issue and efforts to provide a meaningful opportunity for minority, women and other business enterprises to participate in the sale of the Bonds consistent with the goals set forth in LADWP's Outreach Program,
- the desire to coordinate the timing of what continues to be a volatile interest rate environment,
- the desire to implement a retail order period aimed at reducing borrowing costs,
- the benefits of a motivated and incentivized underwriting pool that will bring to LADWP cost effective ideas and financing proposals for debt service savings, and
- the benefits of banks offering low cost credit facilities given the opportunities to receive negotiated underwriting opportunities.
