I was reading that the LA council wants contractors to say if they have any connection to the NRA.

This cant be right in America. I know everybody thinks California is mentally unstable but this must be against the law.

If this is true, it is not right and how could you do this. I don't plan to go any where around LA due to the gang activity.

To much violence in LA but you have time to threaten contactors. Your strict gun laws really help with you gang activity.

Hope somebody sues your city for being just plain mean. Just mean and anti American.
