**Blowing down the Mayan ? .**

My question is why ? Like at first, my concern was blowing down those two theatres. They're kind of a fun venue to go to. But then I saw that it's 60 stories. Like, oh my god. I just want to know why. Why keep building these ? I mean it's a parking lot. It really doesn't bother me to turn it into something. But like, ... don't you feel like it's a bit overdoing it ? I'm trying to understand. There has to be some logic to it besides money and creating more units. I just don't know what this cities going to look like after all the properties are high-rises, all the units are full, there's no more money left to grab, and we still have all the same problems. That is my fear.
