Comments for Public Posting: My application to use my primary residence as a STR was denied. Reason - it is under RSO. Why is the city discriminating against certain kind(s) of primary residences? Just because we cannot afford to live in a SFR doesn't mean our primary residence is any different. If the purpose of the STRO is to put dwellings back in long-term rental market and stop commercial operators from converting apartments to STR's - this discrimination against primary residences isn't going to help that objective. I have tried reaching the Planning, DBS, STRO team, and others to no avail for the past several months.
