**Alignment of water reporting requirements.**

Sure. Makes sense. What is water reporting ? Water usage ? Water quality ? I think we should talk about how to improve our water storage and procurement so that it's not an issue. I know where I went to school, 98% of the water was appropriated towards local agriculture. And I'm not saying we shouldn't support food, but I think we should look at how we use our water, and how to have more laying around.
