Hollywood Walkability Program, enforcement funding and authorization.

I've said yes to this before, but I've been presented with another perspective.

Walkability, what does this refer to ? What derivative action must be taken to achieve this ? Does this mean more density ? Higher, taller buildings ? I'm not sure I support it if that's what it means.

If density is focused strictly in hollywood, in the touristy locations, then I'm cool with that. Like I've said in the past, I don't care about hollywood. Give the tourists what they want.

If it means wider sidewalks, then I do support that. I want to see the plan, I'm not sure where I can see it.

I'd like to see more information on the program to hold a wiser position.

It appears there may be some opposition to this from the neighborhood that I would like addressed.
