Dear Budget and Finance Committee,

I write today to urge your support for item number 19-0145, to retain outside counsel for potential litigation regarding the Santa Susana Field Laboratory. The City of Los Angeles has long supported the full cleanup of nuclear and chemical contamination at SSFL. We cannot allow the Trump Administration's Dept. of Energy to walk away from its cleanup commitments and leave 98% of the contamination on site, where it will continue to migrate and threaten public health. Please vote yes on item 19-0145.

Hello there,

Please vote in favor of item 19-0145.

I am a parent and resident of Simi Valley in the Santa Susanna mountains and my husband works in Los Angeles. My family and I are very much affected by your vote in favor of pursuing federal cleanup of the Santa Susanna field lab contamination even if we are not direct constituents.

If you recall, the city has already approved the motion to retain legal council and has always been a big supporter of the cleanup, so the committee should vote in favor of continuing the financing of this effort. At only \$.20 per child, the \$600,000 used in this effort will be greatly beneficial in protecting the lives of children from contamination and greatly benefit our community now and in the future. Understandably, the radioactive and toxic site has become more dangerous after the recent Woolsey fire, making cleanup efforts even more of a priority.

Thanks for helping Los Angeles to be a less toxic and radioactive-free environment for everyone.

Sincerely,

Jordana Ross

Subject: Support for item 19-0145

Good day,

I live near the Santa Susana Field Labs, SSFL, I work in Paul Krekorian's district, my daughter and my 2 grand children live in Bob Blumenfields district, I grew up there as well. I'm asking that the budget and Finance committee vote should reflect that the City has already approved the motion to retain legal counsel and please vote to continue with financing the motion.

\$600,000 dollars is only .20 cents per Los Angeles child to help protect them from the radioactive and toxic contamination at the SSFL site.

Thank you for your consideration.

Stephen Andrews

The budget and finance committee vote should reflect that the city has already approved the motion to retain legal counsel and the city has always supported the cleanup. Please continue financing. 600,000 is only \$0.20 per La child to help protect them from radioactive and toxic contamination at the site. We can't leave it contaminated. It must be cleaned up. I lived below the facility and one of my children had Childhood Cancer. This site must be cleaned up. Thank you

My name is Melissa Bumstead and I live in West Hills.

I am the mother who started the [www.change.org/santasusana](http://www.change.org/santasusana) petition that has over 610,000 signatures calling for the 100% cleanup of the Santa Susana Field Lab. My nine-year-old daughter is a two-time cancer survivor and has had treatment costing more than two million dollars. You can understand why I feel \$600,000 is a paltry amount to hire outside council, especially when it will help protect three million children in Los Angeles from the toxic and radioactive contamination found at the Santa Susana Field Lab. It's the same contamination that I believe gave my daughter and fifty-three other children in our community cancer. Six of them have died. And what were their lives worth? Certainly, more than \$600,000. Please vote YES on item 19-0145.

Sincerely,

**Melissa Bumstead**

Hi,

I'm writing to show my support for item 19-0145. Below are reasons why I support 19-0145:

- the city of LA has a long history of support for SSFL cleanup which it must continue
- the Budget and Finance Committee vote should reflect that the City already approved the motion to retain legal counsel and the allocation of up to \$600,000
- Under new CalEPA Secretary Jared Blumenfeld, DTSC has also told DOE it must comply with agreements
- we cannot allow the Trump Administration's DOE to get away with leaving 98% of the contamination at SSFL not cleaned up.
- the Woolsey fire shows how dangerous it is to leave contamination not cleaned up.
- over 600,000 people have signed a petition calling for full cleanup.
- the vast majority of the community supports full cleanup and needs the City to fight for us
- It would only cost \$0.20 per child to fund the litigation that would help protect 3,000,000 children in Los Angeles from the SSFL

Thank you,

Ashlee Shewell
