

Dear LA City Council,

We, the concerned residents, workers, and entrepreneurs of the city of Los Angeles urge you to request funding to ensure the future success of the city's social equity program and an equitable, just, and reparative cannabis industry in this, the largest recreational cannabis market in the world.

We ask that you fully fund:

- Low-interest loans for social equity applicants
- Technical/business assistance
- Workforce development programs
- Expansion of the SEP to the SFV and Boyle Heights
- Safe consumption sites for low-income, houseless, and other vulnerable populations
- Research and education for and by communities most harmed by decades of prohibition

Thank you for helping us build a responsible cannabis industry.

The world is watching.

Sincerely,
