Comments for Public Posting: Please we need at least 300 feet from these tent campers from our homes if not more.

Comments for Public Posting: There should be no camping, sleeping or storing possessions within 300 feet of residences. We have plenty of land in California and there is absolutely no reason we should be letting homeless people camp out wherever they feel like it. LA is becoming a dangerous place as many of these homeless are drug addicts, thieves and mentally ill. In Venice, they have assaulted my neighbors, broke into homes, leave trash and filth everywhere. We must create laws to start protecting the law abiding citizens who actually work and pay taxes, rent and mortgages.

Comments for Public Posting: I think this is fantastic and I support this. Over the past 13 years of living here this has become an ever growing problem. Not so much the vagrancy, but the crime that goes along with it. It bleeds into our neighborhoods robberies, thefts, burglaries etc. I would like to add the idea of adding some support services as well. Although I found from personal experiences that many of the homeless people are happy that way and do not want help.

Comments for Public Posting: I agree that we should be doing more for the homeless population however, this seems to come at the expense of our children as well as our safety. There are numerous issues that need to be addressed here but we need to start by protecting our children. It's bad enough that children are exposed to drugs in schools so now they are also exposed to them in their own front yards. Public parks should be a place where we can go with our children to spend quality time but instead the parks have become a heaven for drug users and the homeless population. Why is it ok that we pay such high prices to live in Southern California but the state of California doesn't seem to care about the quality of life we are currently enduring. How bad does this situation have to get for things to change. Along with all the trash we're currently surrounded by we're also being exposed to numerous health issues we haven't had to worry about for many years such as Hepatitis A, numerous STD's, as well as the bubonic plague. We seriously need to address these issues before this problem becomes worse.

Comments for Public Posting: As a resident of this area and a taxpayer interested in the safety of all who use this park, particularly children, I ask the city to pass this proposal to ban sidewalk camping around a public park.
