3. Authorize the City Administrative Officer to make technical corrections as necessary to transactions included in this report to implement Mayor and Council intentions.

SUMMARY

On June 18, 2019, the Energy, Climate Change and Environmental Justice Committee (Committee) considered a Report prepared by the Bureau of Sanitation (BOS) relative to a new deployment plan addressing livability services, specifically homeless encampment and illegal dumping clean-ups (C.F. 14-1499-S7, et al). The Committee requested the City Administrative Office (CAO) to report back on the funding of proposed overtime expenditures and the potential use of special funds to support the program.

BOS' report proposed two overtime options for enhanced deployment during the months of July, August and September: (1) crews work 18 hours per person per week at a cost of \$2,589,523; or, (2) crews work ten hours per person per week at a cost of \$1,438,624. Based on direction provided by the Committee, this Office has been working with BOS to identify funding for the first option costing approximately \$2.6 million.

The General Fund is the only source of funds that can be used to support BOS' livability services.

CAO has thus far confirmed a total of \$2,096,932 in General Fund savings in BOS' budget and in the General City Purposes account used to fund Lifeline and Low Income reimbursements from prior years that are available to reprogram for overtime. Also, \$10,000 from the Clean Streets LA/HOPE Expansion line item in the Fiscal Year 2019-20 Unappropriated Balance will be used to support overtime. Current year savings are primarily due to continued hiring challenges in key classifications that BOS is working through. CAO will continue to work with BOS to identify the remaining \$500,000 needed to fund the balance and will report back either separately or in the first Financial Status Report.

BOS' report proposed the appropriation and transfer of funds from the Fiscal Year 2019-20 Unappropriated Balance to various accounts. These funds will not be available until July 1, 2019, therefore this report includes recommendations to facilitate these transactions for next Fiscal Year. BOS' report also recommended the transfer of \$693,000 to pay for related costs, however, those costs are recovered through the Human Resources Benefits Fund (HRB) and contributions to the Los Angeles City Employees Retirement System (LACERS) through separate transactions. These funds will be moved separately in a future Financial Status Report.

It should be noted that the Reserve Fund relies on the reversion of prior year funds and that this Office assumed a certain level of reversions for the 2019-20 Reserve Fund. The reprogramming of General Fund savings that would have reverted to the Reserve Fund will impact our calculations and require monitoring to determine if actions are needed in the future to preserve the Reserve Fund. This Office will continue to report on the status of the Reserve Fund in future Financial Status Reports.

The recommendations in this report are in compliance with the City's Financial Policies.

FISCAL IMPACT STATEMENT

Approval of these recommendations will transfer \$440,000 in General Fund appropriations within the Bureau of Sanitation's current year budget, approximately \$1.6 million in prior year funds from the Lifeline Rate Program Account in the General City Purposes Fund and allocate \$6.5 million in the Unappropriated Balance of the Fiscal Year 2019-20 Adopted Budget.
