Item 29 - File# 19-0900S13

Lighting Districts.

I've seen a few of those lightposts go up with 5G on it. They are horrendously girthy. I think we should be thinking about driverless car-systems (instead of subways that necessitate huge project developments), but at the same time I need to ensure that they aren't the cause of any more fires. There is a solution, we just haven't found the right fit to these tumblers.
