**Comments for Public Posting:** I urge you to consider properly funding programs to actually help with homelessness and poverty. While safe parking and emergency host programs can be a great benefit, they are only as good as the service providers appointed to initiate them. I urge you to reconsider the current system and providers, such as LAHSA and SPY that only harm the situation and our community. Please remove and replace these two proven to fail and insubordinate organizations. Please do not allow youth programs to continue to abuse youths and prolong homelessness by funding them further.
