The Honorable Nury Martinez.  
President  
Los Angeles City Council

c/o Holly L. Wolcott  
City Clerk  
City Hall Room 360

**CRISIS AND BRIDGE HOUSING FACILITY AT 4601 S. FIGUEROA ST. (19-1352)  
CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) NOTICE OF EXEMPTION (NOE)**

Dear President Martinez and Honorable Members:

On February 11, 2020, a motion was introduced, moving that City Council authorize funds to support the security deposit, the leasing costs, and to provide crisis shelter services for the Bridge Housing facility at 4601 S. Figueroa St., which is currently developed with a multi-family residence. The facility will accommodate approximately 12 families.

**RECOMMENDATION**

Staff recommends that Council determine the Crisis and Bridge Housing facility on 4601 S. Figueroa St., which allows for the lease of the property and use as temporary shelter for those experiencing homelessness, is statutorily exempt under Public Resources Code Sections 21080.27 for City of Los Angeles bridge homeless shelters, and 21080(b)(4) as a specific action necessary to prevent or mitigate an emergency as reflected also in State CEQA Guideline Section 15269(c). Please refer to the attached NOE.

If you have any questions, please contact Maria Martin at (213) 485-5753.

Sincerely,

For Gary Lee Moore, PE, ENV SP  
City Engineer

**OFFICE OF THE CITY CLERK  
ROOM 395, CITY HALL  
LOS ANGELES, CALIFORNIA 90012  
CALIFORNIA ENVIRONMENTAL QUALITY ACT  
NOTICE OF EXEMPTION  
(Articles II and III – City CEQA Guidelines)**

This form shall be filed with the County Clerk, 12400 E. Imperial Highway, Norwalk, California, 90650, and the Office of Planning and Research pursuant to Public Resources Code Sections 21080.27(c) and 21152(b). Pursuant to Public Resources Code Section 21167(d), the filing of this notice starts a 35-day statute of limitations on court challenges to the approval of the project.

<b>LEAD CITY AGENCY AND ADDRESS:</b> City of Los Angeles c/o Bureau of Engineering 1149 S. Broadway, MS 939, Los Angeles, CA 90015	<b>COUNCIL DISTRICT</b> 09
<b>PROJECT TITLE:</b> CD 09 4601 S. Figueroa St. Bridge Housing Facility	<b>LOG REFERENCE</b> C.F. No. 19-1352

**PROJECT LOCATION:** 4601 S. Figueroa St., Los Angeles, CA 90037 T.G. 634 B4

**DESCRIPTION OF NATURE, PURPOSE, AND BENEFICIARIES OF PROJECT** The project includes a new lease and operation of a homeless shelter that will provide emergency shelter, hygiene, storage, food services and case management to individuals experiencing homelessness. The nature of this project is to serve the local homeless community within the vicinity of the project. The purpose of the project is to provide emergency shelter for homeless families to help bridge their transition from living on the streets to finding services and, ultimately, living in transitional and/or permanent housing. The site property is located in the South Los Angeles Community Plan Area in the City of Los Angeles Council District 9 (CD 9), 4601 S. Figueroa St., Los Angeles, CA 90037, Assessor's Parcel Number (APN) 5018-029-003, see *Figure 1 – Project Site Location and Figure 2 – Assessor Parcel Map*. The project site is approximately 9,060-square feet (sf) and is currently developed. The property site includes an existing approximately 4,488 square-foot (sf) multi-family residential structure on a privately owned parcel. The structure has been previously improved as a care facility with approximately twelve (12) bedrooms. A lease between Los Angeles Homeless Services Authority (LAHSA) and the service provider Brilliant Corners, or an equivalent service provider, will provide services to operate the facility with funding from the City of Los Angeles in furtherance of providing the emergency shelter developed under this project. The project includes housing for up to 15 families. Project beneficiaries include the homeless community, the public and local businesses. (Please see the attached narrative for more details). On \_\_\_\_\_, the City Council determined this action was exempt from CEQA and approved the project.

## EXEMPTION NARRATIVE

### I. PROJECT DESCRIPTION, CONTINUED

The project includes the lease and operation of A Bridge Home homeless shelter that will provide emergency shelter, hygiene, storage, food services and case management to families experiencing homelessness. The project site is located on one lot in the South Los Angeles Community Plan Area in the City of Los Angeles Council District 9 (CD 9), 4601 S. Figueroa St., Los Angeles, CA 90037, Assessor's Parcel Number (APN) 5018-029-003, see *Figure 1 – Project Site Location* and *Figure 2 – Assessor Parcel Map*. The project site is on a rectangular shaped approximately 9,060-sf privately owned parcel that includes one lot currently developed with a 4,488-sf multi-family residential building that was improved as a care facility with twelve (12) bedrooms.

The project involves the lease and operation between Los Angeles Homeless Services Authority (LAHSA) and the Brilliant Corners or other similar service provider to operate the facility owned by private land owner. LAHSA will get funded from the City of Los Angeles to lease and operate the facility in furtherance of providing the emergency shelter developed under this project. The project includes housing for up to 15 families. The project is zoned C2 with a Neighborhood Commercial land use. The site is located just south of the intersection of Vernon Ave. and S. Figueroa St. and is bounded on the east by S. Figueroa St., on the south by 47<sup>th</sup> St., on the west by Hoover St., and on the north by 46<sup>th</sup> St. Parcels that surround the site on the north, south and east are zoned commercial. Parcels to the west are zoned for residential uses.

The project will be operated pursuant to standard conditions for emergency shelters in the City's A Bridge Home program, which requires that the contracts for operating the project with service providers comply with LAHSA's shelter program requirements, such as LAHSA's Bridge

Housing Program Scope of Required Services, LAHSA's Program Standards, and LAHSA's CES for Families Principles and Practices that were approved by the CES Policy Council on August 23, 2017.

This is a family A Bridge Home shelter that shall allow for the presence of children under 18 years of age. The project will be operated with separate, private rooms for each family and will allow for the presence of partners. This Bridge Home will be pet friendly. Although a pet area has not been identified onsite, residents may walk their dogs in the surrounding neighborhoods and must adhere to all of the pet laws within the Los Angeles Municipal Code. The project has storage for personal possessions within each personal room. Each room has a bathroom and private living quarters. Applicable Housing First programming and Harm Reduction approaches will be adhered to by the private Service Provider for this family shelter.

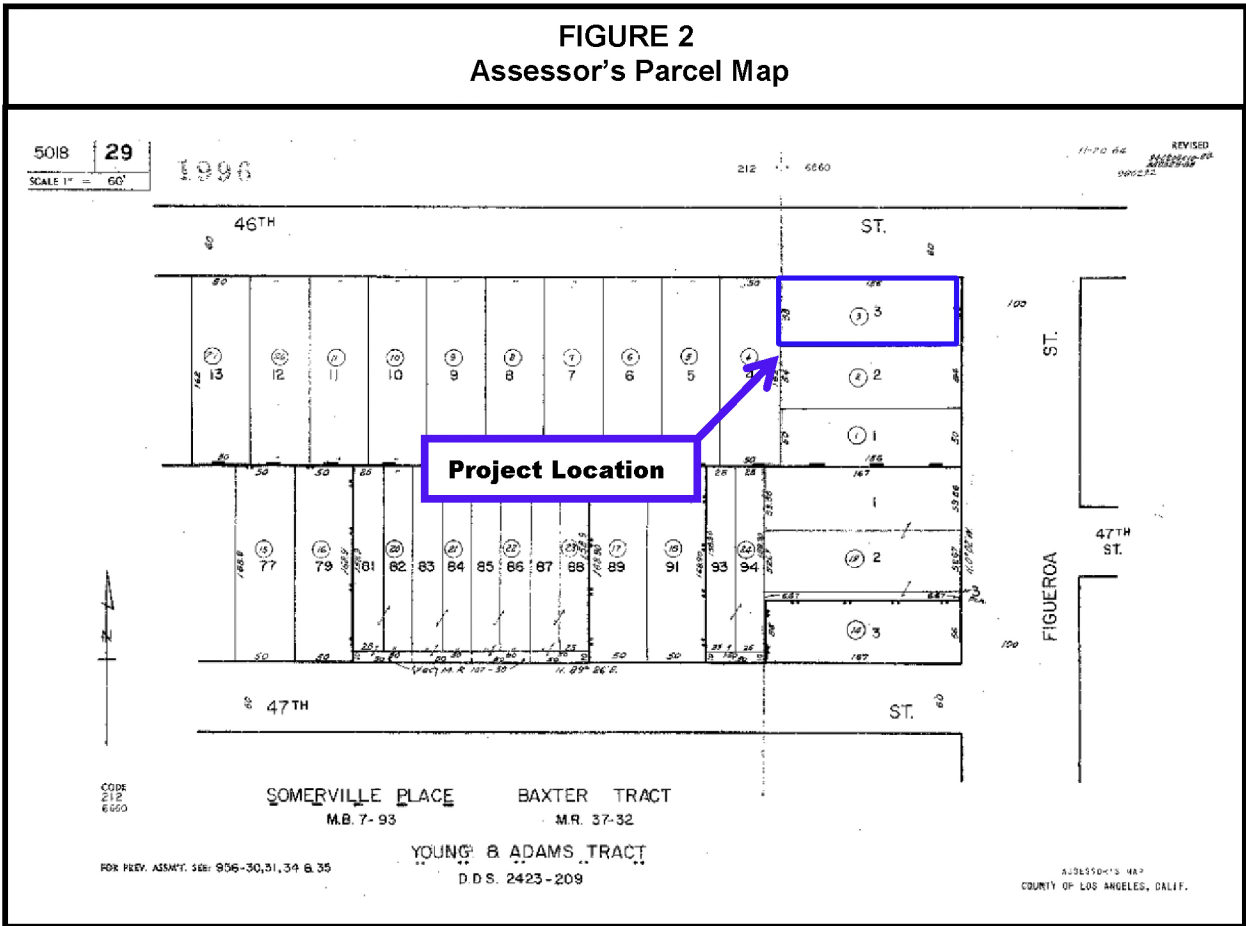

LAHSA will receive City funding to operate this project. Funding may be from LA County Measure H funds or equivalent, in coordination with the County of Los Angeles. LAHSA will enter into a lease with Brilliant Corners or another service provider to operate this project. The private service provider who will operate this A Bridge Home is required to operate this facility with Harm Reduction approaches to protect the children who will be present on-site. This includes practices to lock controlled substances and other harmful possessions in lockers that are monitored by staff 24 hours a day and are not allowed to be used on site in front of children.

The proposed project will be operated by Brilliant Corners or equivalent Service Providers in partnership with the Los Angeles Homeless Services Authority (LAHSA), or another City vendor. Full staff will be onsite during daytime operational hours to provide services. The site will be continuously staffed, 24 hours a day, with security personnel, and provided with security directional lighting.

The project will be operated pursuant to standard conditions for emergency shelters in the City's A Bridge Home program, which requires that the contracts for operating the project with service providers comply with LAHSA's shelter program requirements, such as LAHSA's Bridge Housing Program Scope of Required Services and LAHSA's Program Standards, and LAHSA's CES for Families Principles and Practices that were approved by the CES Policy Council on August 23, 2017.

These requirements include all of the requirements in Government Code sections 65660 and 65662 for being a Low Barrier Navigation Center. These operational requirements are discussed in more detail in the following sections of this document.

**FIGURE 2  
Assessor's Parcel Map**

## II. PROJECT HISTORY

The presence of the unsheltered homeless population and their homeless encampments has increased over the prior year by 16% in the City of Los Angeles. As shown on *Table 3 - 2019 Homeless Count Data Summary*, Total Homeless Persons increased 19% in the same period and Sheltered Homeless increased 5%. Some areas of the city have seen negative effects to access of public places, access routes; and businesses have been hindered. There are a growing number of support services to help the homeless find their way off the streets, however, more shelter and services are needed.

The latest homeless count in the project area was completed by the Data and Research Unit of the Los Angeles Homeless Services Authority. See *Table 1- Homeless Population Count* for the homeless population count prepared by this Unit on January 21, 2020 for the census tract associated to the proposed project (Tract Number 2321.20) and for various radii from the site (Reference 1, 2).

### Project Area Homelessness

The recent homeless count in the project area was completed by the Data and Research Unit of the Los Angeles Homeless Services Authority. See *Table 1- Homeless Population Count* for the homeless population count prepared by this Unit on January 21, 2020 for the associated census tract (Tract Number 2321.20) of the project site and for various radii from the site (Reference 1, 2). The project area homelessness data is consistent with the Citywide data, documenting a significant homeless population presenting a danger to health, life, public safety and undue burden on essential public services as detailed further below.

<b>Table 1 Homeless Population Count</b>				
<b>Homeless Population</b>	<b>Within Census Tract (2321.2.2)</b>	<b>Within .5 miles</b>	<b>Within 1.0 miles</b>	<b>Within 1.5 miles</b>
Unsheltered	33	326	1324	2872
Sheltered	0	83	549	1227
<b>Total</b>	<b>33</b>	<b>409</b>	<b>1873</b>	<b>4099</b>

This Bridge Home homeless shelter project is designed to mitigate the impacts caused by the spike in homelessness. The 2019 increase in City homelessness was both sudden and unexpected. Prior to June 2019, homelessness had been decreasing following County and City efforts, showing that the June 2019 dramatic increase in homeless persons was both unexpected and sudden.

The dramatic increase in homelessness identified in June 2019 and the attendant significant adverse public health, safety, and welfare impacts that are associated with homelessness will be exacerbated if these homeless shelter projects are delayed. Homeless populations themselves suffer from adverse health impacts greater than the non-homeless population, including greater risk of death. Homeless individuals impose outsized impacts upon and use public safety and public health resources compared to the general population. The dramatic

increase of the already large Los Angeles-area homeless population shows that this situation meets the definition of an emergency because it presents a clear and imminent danger that demands immediate action to prevent or mitigate loss of, or damage to, life, health, property, or essential public services. This Bridge Home project is needed to mitigate the unexpected and dramatic surge in homelessness in the City of Los Angeles.

### III. THE PROJECT IS EXEMPT FROM CEQA BASED ON A STATUTORY EXEMPTION IN PUBLIC RESOURCES CODE SECTION 21080.27 APPLICABLE TO BRIDGE HOMELESS EMERGENCY SHELTER PROJECTS LOCATED IN THE CITY OF LOS ANGELES

Assembly Bill 1197 (AB 1197) was signed into law on September 26, 2019, which adopted Section 21080.27 of the California Public Resources Code (PRC) and created a statutory exemption for compliance with CEQA for emergency shelter projects located within the City of Los Angeles. The intent of AB 1197 is to help the City of Los Angeles address its homeless crisis and is an urgency statute that is deemed necessary for the immediate preservation of the public peace, health, or safety and for the critical necessity to address the shelter and homeless crisis. AB 1197 took immediate effect on September 26, 2019 in order to address the unique circumstances faced by the City of Los Angeles and to expedite the development of emergency homeless shelters. As noted in the following sections, this shelter project complies with the requirements in AB 1197, and thus the project is exempt from CEQA pursuant to AB 1197 (Pub. Resources Code, section 21080.27).

#### A. City of Los Angeles Declaration of a Shelter Crisis

Public Resources Code, section 21080.27(a)(2) requires that emergency shelters be approved during a shelter crisis under Government Code, section 8698.2. The City of Los Angeles (the City) City Council has declared a homeless shelter crisis pursuant to Government Code Section 8698, et seq. on April 17, 2018 (Council File No. 15-1138-S33), which is currently in effect (Council File No. 15-1138-S40 [June 14, 2019]).

#### B. The Project Meets the Definition of a Low Barrier Navigational Center in Government Code Section 65660

AB 1197 is an urgency statute that is necessary for the immediate preservation of public peace, health and safety that addresses the unique circumstances faced by the City of Los Angeles, and allows for the expeditious development of emergency shelters. The intent of AB 1197 is to help the City address its homeless crisis by developing emergency shelters pursuant to the crisis declaration. The City builds these emergency shelters pursuant to its “A Bridge Home” program.

Under AB1197, emergency shelters must meet the definition of “Low Barrier Navigational Center” in Government Code Section 65660, which defines Low Barrier Navigation Center as a “Housing First, low-barrier, service-enriched shelter focused on moving people into permanent housing that provides temporary living facilities, while case managers connect individuals experiencing homelessness to income, public benefits, health services, shelter and housing.”

**Service-Enriched Shelter with Case Managers Connecting to Services.** The requirements are met by this project for a “service-enriched shelter focused on moving people into permanent housing that provides temporary living facilities, while case managers connect families experiencing homelessness to income, public benefits, health services, shelter and housing.” This project provides temporary housing through the lease and operation of a shelter, with case managers staffing the facility that provide connections to these homeless family services and

assistance for the occupants. This is one of the fundamental purposes of this shelter project. For example, the project's programs include Trauma Informed Care policies and procedures that involve understanding, recognizing, and responding to the effects of all types of trauma. Trauma Informed Care also emphasizes physical, psychological and emotional safety for both participants and providers, and helps participants rebuild a sense of control and empowerment. Trauma Informed services take into account an understanding of trauma in all aspects of service delivery and place priority on the trauma survivor's safety, choice, and control. Trauma Informed Care services create a culture of nonviolence, learning, and collaboration.

The A Bridge Home program shelters are operated by service providers coordinated with the Los Angeles Homeless Services Authority (LAHSA). This A Bridge Home will be operated on a private property not owned by the City of Los Angeles. The intention of this emergency A Bridge Home project is to provide participants with some stability, so that they can more easily maintain contact with housing navigation and/or case management services to facilitate safe and supportive housing placement.

Per LAHSA's 2018-2019 Bridge Housing Scope of Required Services (SRS), service providers that oversee an A Bridge Home shelter must provide case management services and develop a Housing Stability Plan with each family. A Bridge Home program implements a case management and service plan known as Housing-Focused Case Management and Support Services (HFCMSS). HFCMSS includes but is not limited to: support with completing housing applications, accompanying the participant to housing appointments and/or leasing appointments, and other support associated with the housing placement process. The primary objective of HFCMSS is to extend support to participants through an individualized case management relationship that will ultimately translate to increased housing stability. The HFCMSS offers services to connect participants to permanent housing. Case Managers present at the shelter make rapid connections to a broad continuum of resources and permanent housing, emphasizing a short-term stay in the Bridge Housing bed.

HFCMSS connects participants to a Housing Navigator who assists participants to gain access to permanent housing through referrals to housing programs (such as RRH, Permanent Supportive Housing, affordable housing, etc.). A case manager is assigned to a family when the family enters the program and then helps the participant establish a connection to a Housing Navigator. A Housing Navigator assists family with Housing Navigation services. Housing Navigation services are available to family to support their housing placement goals and must be focused on assisting the participant in identifying and accessing permanent housing within the general ninety (90) days of the A Bridge Home stay. Housing Navigation services may be provided onsite, and may also require participants' to be accompanied to off-site appointments.

Case management must be conducted on a regular and routine basis and must be routinely documented. The content and outcome of case management meetings with participants are entered into a housing management information system with case notes that are tracked in the system. Housing-focused case management sessions are dedicated to assessing and reassessing needs, educating participants on community resource opportunities, developing Housing Stability Plans, scheduling appointments, and providing necessary follow up to ensure housing stability plans are progressing on schedule and needs are adequately being addressed.

As noted in LAHSA's 2018-2019 Program Standards, supportive services for the shelters focus on the income, resources, skills and tools needed to pay rent, comply with a lease, take reasonable care of a housing unit, and avoid serious conflict with other tenants, the landlord, and/or the police. The Program Standards also require service providers to utilize and maintain referral networks with specific lists of health services and public benefit services for connecting

occupants to those benefits. Thus, the project is a service-enriched shelter focused on moving people into permanent housing that provides temporary living facilities, while case managers connect individuals experiencing homelessness to income, public benefits, health services, shelter and housing.

**Housing First.** The Project is a “Housing First” shelter pursuant to Government Code Section 65660. Also, in being such a Housing First shelter, the project complies with Chapter 6.5 of Division 8 of the Welfare and Institutions Code (commonly referred to as the Housing First Law) as required by Government Code Section 65662 (discussed further below). “Housing First” means the evidence-based model that uses housing as a tool, rather than a reward, for recovery from homelessness, and that centers on providing or connecting homeless people to permanent housing as quickly as possible. Housing First providers offer services as needed and requested on a voluntary basis and that do not make housing contingent on participation in services.

Housing First also includes time-limited rental or services assistance, so long as the housing and service provider assists the recipient in accessing permanent housing and in securing longer-term rental assistance, income assistance, or employment.

In the event of an eviction, programs shall make every effort, which shall be documented, to link tenants to other stable, safe, decent housing options. Exit to homelessness should be extremely rare, and only after a tenant refuses assistance with housing search, location, and move-in assistance. If resources are needed to successfully divert a family from entry into the homelessness system, a referral must immediately be made to a CES Diversion/Prevention program. In order to identify other permanent housing options, service providers continue to have such problem solving conversations with the family while residing in Bridge Housing. More broadly, the project includes a housing and services plan and housing-focused case management, both with an orientation towards supporting families to exit to safe and stable housing.

**Harm Reduction.** “Harm Reduction” approaches are used in LAHSA’s Coordinated Entry System (CES) for Families which facilitates the implementation and coordination of the crisis response in Los Angeles County. LAHSA’s CES integrates the “Housing First” model that is consistent with various “Harm Reduction” approaches into its housing and supportive services. “Harm Reduction” focuses on the reduction and mitigation of risky behaviors and consequences associated with drug and alcohol use. LAHSA has used “Harm Reduction” strategies to create a safe environment for homeless families that have members who may have mental illness and drug addictions.

Along with Housing First and Trauma Informed Care, Harm Reduction approaches support LAHSA’s CES for Families by serving the highest in need and the most vulnerable families to promote the availability of supportive services to ensure a stable tenancy. It provides a low-barrier and quick access to housing and mental health support services in order to place families into permanent independent housing without prerequisites of sobriety and treatment.

This project additionally meets the other above-noted Housing First requirements. The A Bridge Home program shelters are operated by service providers coordinated through LAHSA. All service providers must comply with LAHSA’s Scope of Required Services, Program Standards, and Facility Standards. Per LAHSA’s 2018-2019 Program Standards, all eligible participants are to be served with a Housing First approach. LAHSA’s CES for Families’ Principles and Practices that were approved by the CES Policy Council on August 23, 2017 shall be used to guide the development of systems-level policy and to ensure transparent and accountable

decision-making with privately owned Service Providers who enter into a partnership with LAHSA. The basic underlying principle of LAHSA's System Components is that access to housing is the primary need for its program participants. Services are voluntary and not required to enter into a shelter. Participants will not be rejected or exited from participation in Bridge Housing due to any unnecessary barriers.

The City's A Bridge Home program is intended to be a Housing First program focused on quickly moving people experiencing homelessness into permanent housing and then providing the additional supports and services each person needs and wants to stabilize in that housing. The basic underlying Housing First principle is that persons are better able to move forward with their lives once the crisis of homelessness is over and they have control of their housing. The City's shelters developed under the A Bridge Home program, including this emergency shelter project, provide a safe, low barrier, housing-focused, and homeless services support in a twenty-four (24) hour residence to help people who experience homelessness that meet the above-noted requirements for Housing First. One of the core components of the Housing First model is that longer-term housing accepts referrals directly from shelters. The City's shelters, including this project, are primarily focused on connecting, transitioning, and referring homeless families into such permanent housing as quickly as possible in the Housing First model, and accepting occupants through the crisis response system. The intention of this emergency "A Bridge Home" shelter project is to provide participants with some stability, so that they can more easily maintain contact with housing navigation and case management services and facilitate safe and supportive housing placement. Services in the City's shelters, including this project, are never mandatory and cannot be a condition of obtaining the housing intervention. This project will provide temporary housing, family case managers and Housing Navigators staffed at the facility who provide connections to homeless services for the occupants. Based on the above-noted information, the project's emergency shelter meets the Housing First requirements relative to AB 1197.

**Low Barrier.** "Low Barrier" means the shelters use best practices to reduce barriers to entry, including but not limited to, the presence of partners (if it is not a population-specific site, such as for survivors of domestic violence or sexual assault, women, or youth); pets; storage for possessions; and privacy (such as partitions around beds in a dormitory setting or in larger rooms containing more than two beds, or private rooms). The City's shelters, including this project, meet these requirements.

The project provides private rooms which allows for presence of partners. This project is pet friendly. Participants are allowed to bring their pets to the shelter and live with them inside their room. There is no pet play area onsite. The project has storage within each room for personal possessions. The project is designed to provide privacy to participants by providing each family with their own room. Each room has a bathroom and private living quarters. Therefore, the project is managed and designed to allow the privacy of participants and is a pet friendly facility for participants who choose to be accompanied by their pets.

The project uses low barrier best practices that reduce barriers to entry. They include the allowance for presence of partners, pet friendly facilities, storage areas for possessions, and management and design for individuals' privacy. All of the City's Bridge Home program emergency shelters, including this project, meet these requirements. Therefore, none of the noted conditions would preclude access to the project, and the project is considered bridge housing that is "low barrier" within the meaning of Government Code Section 65660 and AB 1197.

In sum, based on the above-noted information, which is additionally explained and provided with

additional details in the documents from LAHSA cited in the Reference section to this document, the project meets the definition of Low Barrier Navigation Center set forth in Government Code Section 65660.

### C. The Project Meets the Requirements of Government Code Section 65662

Under AB1197, emergency shelters must meet the four requirements identified in Government Code Section 65662(a) through (d), which are each discussed in turn in this section.

**Connecting to Permanent Housing through a Services Plan.** Government Code Section 65662(a) requires that Low Barrier Navigation Centers offer services to connect people to permanent housing through a services plan that identifies services staffing. This project meets that requirement. As noted above, the project includes housing-focused case management sessions that involve developing Housing Stability Plans/Housing and Services Plans, scheduling appointments, and providing necessary follow up to ensure housing stability plans are progressing on schedule and needs are adequately being addressed. This is required in LAHSA's Scope of Required Services.

The Housing Stability Plan is the participant's service plan that summarizes the participant's housing goals, services needed, what will be provided, actions that need to be taken (by staff and the participant), and referrals that need to be made. Case managers develop the services plan in coordination with the participant right after intake and assessment, track the plan in a homeless management information system, and revise the plan as the person's situation changes and steps are completed or revised accordingly.

Participants are assisted with a range of activities that address the stated goals of the participant in the Housing Stability Plan, including but not limited to:

- Accessing personal identification (For quick referral to permanent housing)
- Accessing certification of the current income (For quick referral to permanent housing)
- Mainstream Benefits
- Substance Abuse services
- Mental Health Services
- Health Services
- Vocational Services
- Employment Services
- Educational Support
- Legal Services
- Life Skills Development
- Independent Living Program for Youth
- Transitional Housing Program for Youth
- CES and CoC Rapid Re-Housing Program
- Housing Navigation Assistance
- CoC Permanent Supportive Housing
- LA County Department of Health Services, Housing for Health or Housing and Jobs Collaborative
- LA County Department of Health Services, Countywide Benefits Entitlement Services Team
- LA County Department of Mental Health, Countywide Housing Assistance Program
- Veterans Administration Housing Programs
- Housing Opportunities for Persons with Aids (HOPWA) Housing
- Crisis Housing for Unaccompanied Youth

- Youth Family Reconnection Program

Progress and problems implementing the plan are reviewed and updated frequently.

**Coordinated Entry System.** Government Code Section 65662(b) requires Low Barrier Navigation Centers to be linked to a coordinated entry system allowing staff and co-locating staff to conduct assessments and provide services to connect people to permanent housing. This is required by LAHSA's Scope of Required Services and Program Standards. Thus, all City of Los Angeles homeless shelters, including this project, are linked to the Los Angeles County Coordinated Entry System, a centralized or coordinated assessment system designed to coordinate program participant intake, assessment, and referrals. The residents are prioritized through the coordinated entry system in the Los Angeles County Coordinated Entry System for safe and supportive housing resources. The City's A Bridge Home program collaborates with Los Angeles County Case Entry System and provides case management services to program participants through a Housing Stability Plan. A Bridge Home case managers must develop a Housing Stability Plan in coordination with the participant right after intake and assessment. The Housing Stability Plan must be tracked in a Homeless Management Information System (HMIS) along with the date of completion.

The A Bridge Home program collaborates with Los Angeles County Case Entry system Housing Navigators and case managers from other outside agencies to provide case management services to program participants. Los Angeles County Coordinated Entry System case managers work with participants and assist by facilitating services appointments; and then eventually help them find permanent housing.

**Compliance with Welfare and Institutions Code.** Government Code Section 65662(c) requires Low Barrier Navigation Centers comply with Chapter 6.5 of Division 8 of the Welfare and Institutions Code, which specifies the Housing First requirements. As noted above, the City's A Bridge Home shelters, including this project, are Housing First shelters, and thus they comply with this requirement.

**Homeless Management Information System.** Government Code Section 65662(d) requires Low Barrier Navigation Centers to have a system for entering stays, demographics, income, and exit destination through a local Homeless Management Information System designed to coordinate program participant intake, assessment, and referrals. These are required by LAHSA's Scope of Required Services and Program Standards. The City's A Bridge Home emergency shelters use such a system in the Los Angeles Continuum of Care Homeless Management Information System (HMIS). In 2001, Congress directed the U.S. Department of Housing and Urban Development (HUD) to ensure the collection of more reliable data regarding the use of homeless programs. HUD required all Continuum of Care applicants to demonstrate progress in implementing a Homeless Management System (HMIS). LAHSA led a regional planning process, encompassing three Continuums of Care - Los Angeles, Glendale, and Pasadena. This process resulted in the selection of a system that would not only satisfy the HUD mandate, but would also provide the Los Angeles Continuum with a means to measure the effectiveness of programs serving homeless people. Presently, the Los Angeles Continuum of Care (LACoC) is part of a collaborative called the Los Angeles HMIS Collaborative. The LA HMIS Collaborative consists of three Continuums of Care (CoC): Los Angeles, Glendale, and Pasadena.

HMIS is a web-based application that is designed to collect information on the characteristics and service needs of homeless persons. The system allows agency users and the Los Angeles Homeless Services Authority (LAHSA) to use collected information for informed programmatic

decision-making. Participating agencies collect and input standardized client-level and demographic data into the system, including client/household demographic details; relationships within a family and household; client/household income; client/household documents; case management and services; housing placements; and progress for housing retention. The HMIS includes a focus on Outcomes Management that sets and measures milestones and target achievements of clients and program performance.

Participants' Housing Stability Plans are tracked in a Homeless Management Information System (HMIS) along with the date of completion. Case managers complete a Monthly Update with the participant to assess progress towards achieving the goals defined in the Housing Stability Plan. All services must be tracked and information are provided to participants in HMIS with the goal of the participant achieving housing stability and sustainability upon exit from the program. Exit destination information is also collected. Accordingly, the project meets the HMIS requirements.

In sum, based on the above-noted information, which is additionally explained in more detail in the documents from LAHSA cited in the Reference section to this document, the project meets the requirements set forth in Government Code Section 65662.

#### D. The Project is in a Qualified Location Under AB 1197

AB 1197 requires that the site be located in "either a mixed-use or nonresidential zone permitting multifamily uses or infill site...." (Public Resources Code section 21080.27(a)(2).) As noted in the communication provided by the City's Planning Department on October 30, 2019, the project is considered an infill site because the site has been developed with, and its perimeter is surrounded by, qualified urban uses.

The project site includes a portion of one lot that is approximately 9,060-sf located just south of the intersection of Pico Blvd. and La Cienega Blvd. The site is surrounded by commercial and residential land uses. The site has been previously developed as a multi-family residential structure, which is a qualified urban use. The Department of City Planning has determined that the proposed Project is considered infill development and is therefore considered a qualified location under AB 1197.

#### E. The Project Involves Qualified Funding Under AB 1197

Public Resources Code Section 21080.27(a)(2)(A)-(D) exempts emergency shelter projects from CEQA which have at least a portion of the funding from qualified sources. The project is funded, at least in part, through the State of California Homeless Housing, Assistance and Prevention Program grant, State of California Business Consumer Services, and Housing Agency or Measure H. Therefore, the project is consistent with the funding requirements of AB 1197. Because these funding sources are qualified funding sources under Public Resources Code Section 21080.27(a)(2)(A), the funding requirement under AB 1197 is met.

#### F. The City's Actions Qualify under AB 1197 as Actions in Furtherance of Providing Emergency Shelters in the City of Los Angeles

Public Resources Code Section 21080.27(b)(1), exempts from CEQA "any activity approved by or carried out by the City of Los Angeles in furtherance of providing emergency shelters or supportive housing in the City of Los Angeles." This project involves an emergency shelter, as described above, which is located in the City of Los Angeles. Brilliant Corners will be constructing the emergency shelter for this project. The City will provide the funding for LAHSA

to enter into a contract with Brilliant Corners, or equivalent service provider, to lease and operate of the emergency shelter. Therefore, the City's actions are in furtherance of providing emergency shelters in the City of Los Angeles, and qualify for exemption from CEQA under AB 1197.

G. The Project Involves an Eligible Public Agency taking a Qualified Action under AB 1197

Public Resources Code Section 21080.27(b)(2), exempts from CEQA certain activities by specified Eligible Public Agencies. The Eligible Public Agencies are, as follows: (A) The County of Los Angeles; (B) The Los Angeles Unified School District; (C) The Los Angeles County Metropolitan Transportation Authority; (D) The Housing Authority of the City of Los Angeles; (E) The Los Angeles Homeless Services Authority; (F) The Los Angeles Community College District; (G) The successor agency for the former Community Redevelopment Agency of the City of Los Angeles; (H) The Department of Transportation; and (I) The Department of Parks and Recreation. AB 1197 exempts "any action by an eligible public agency to lease, convey, or encumber land owned by that agency, or to any action taken by an eligible public agency to facilitate the lease, conveyance, or encumbrance of land owned by that agency, or to any action taken by an eligible public agency in providing financial assistance, in furtherance of providing emergency shelters or supportive housing in the City of Los Angeles."

This operation of the project involves the partnership with Brilliant Corners, or another equivalent service provider and LAHSA, who will lease the property to a private land owner in furtherance of the City building and operating an emergency shelter in the City of Los Angeles. Therefore, this action is exempt under AB 1197.

H. Conclusion

Based on the above-noted information, the project is exempt from CEQA pursuant to Public Resources Code Section 21080.27.

**IV. THE PROJECT IS EXEMPT FROM CEQA BASED ON STATUTORY EMERGENCY EXEMPTION**

**A. Emergency CEQA Statutory Exemption**

Public Resources Code section 21080(b)(4) provides that CEQA does not apply, to "specific actions necessary to prevent or mitigate an emergency." Public Resources Code section 21060.3 defines Emergency as, "a sudden, unexpected occurrence, involving a clear and imminent danger, demanding immediate action to prevent or mitigate loss of, or damage to, life, health, property, or essential public services." Section 21060.3 further provides that Emergency, "includes such occurrences as fire, flood, earthquake, or other soil or geologic movements, as well as such occurrences as riot, accident, or sabotage."

Finally, 14 California Code of Regulations (the CEQA Guidelines) section 15269, "Emergency Projects," provides examples of emergency projects exempt from the requirements of CEQA, including the following:

- (c) Specific actions necessary to prevent or mitigate an emergency. This does not include long-term projects undertaken for the purpose of preventing or mitigating a situation that has a low probability of occurrence in the short-term, but this exclusion does not apply

(i) if the anticipated period of time to conduct an environmental review of such a long-term project would create a risk to public health, safety or welfare, or

(ii) if activities (such as fire or catastrophic risk mitigation or modifications to improve facility integrity) are proposed for existing facilities in response to an emergency at a similar existing facility.

The project is a specific action necessary to prevent or mitigate an emergency – the conditions arising from a sudden and unexpected dramatic rise in the City’s already dangerously large homeless population. The project, therefore is exempt from CEQA environmental review pursuant to Section 21080(b)(4).

### **B. Homelessness Imposes a Loss of, or Damage to, Life, Health, Property, and to Essential Public Services**

Homelessness presents a danger of loss or damage to the health and property of the people of the City and an undue burden on essential public services. Homeless persons constitute approximately .0078 percent of the City’s population (Reference 3 ).

In 2018, homeless persons constituted 13.5 percent of LAFD’s total patient transports to a hospital, meaning a homeless person is 17 percent more likely to require emergency hospital transportation than the general population (Reference 4). Studies have shown that individuals identified as homeless utilize health care services more frequently than comparable non-homeless individuals of the same age, gender, and low-income status, particularly high-cost services such as ER visits and psychiatric hospitalizations (Reference 5).

Los Angeles County’s Chief Executive Officer reported the County spent \$965 million on health, law enforcement, and social services toward individuals experiencing homelessness in fiscal year 2014–2015 (Reference 6). Consistent with that report, a 1998 study in the *New England Journal of Medicine* found that homelessness was associated with substantial excess costs per hospital stay in New York City, with homeless patient staying in the hospital 36 percent longer per admission on average than other patients (Reference 7).

Homelessness also causes significant danger to the health and lives of persons who are homeless. Homeless individuals living in the City are frequent crime victims. In 2018, LAPD reported 2,965 instances where a homeless individual was a victim of a serious crime, including homicide, rape, aggravated assault, theft, and arson (also known as “Part 1 Crimes.”) (Reference 8) This compares to 1,762 such crimes in 2017, a 68 percent increase (*Id.*). This dramatic increase in Part 1 Crime statistics may be due to more rigorous LAPD data collection methodologies, but is consistent with the increasing incidence of homelessness documented in June of 2019 detailed below (*Id.*).

Overall, in 2018, the LAPD reported 6,671 instances in total where a homeless individual was a Part 1 Crime victim and/or suspect, among the 31,285 estimated homeless individuals throughout the City (*Id.*). This means that in 2018 there was approximately one Part 1 Crime per every 4.68 homeless individuals in the City. By comparison, for the same year LAPD reported 129,549 total Part 1 Crimes Citywide among an estimated population of 4,054,400 City residents, or approximately one Part 1 crime per every 31.29 City residents. Accordingly, the rate of Part 1 crimes among homeless individuals in 2018 was approximately seven times higher than the rate among the City population as a whole (*Id.*).

On October 4, 2018 and again on February 6, 2019, the Los Angeles County Department of

Public Health identified an outbreak of endemic flea-borne typhus in downtown Los Angeles among persons experiencing homelessness. On September 19, 2017, the Los Angeles County Department of Public Health declared a Hepatitis A virus outbreak among persons who are homeless and/or use illicit drugs in the County. Likewise, a January 2018 report from the Los Angeles County Department of Mental Health reported that data from the Los Angeles County Medical Examiner-Corner's showed that a significant number of deaths in the homeless population were caused by treatable conditions such as arteriosclerotic cardiovascular disease, pneumonia, diabetes, cancer, cirrhosis, severe bacterial infections and other conditions (Reference 9). As noted more recently by the Board of Supervisors for the County of Los Angeles on October 29, 2019:

[M]ortality rates for people experiencing homelessness are much higher than those for the general population, have risen in the County over the past five years, and are expected to increase again for 2019. [¶] A recent analysis by the County's Department of Public Health on mortality rates and causes of death among people experiencing homelessness shed critical light on this issue and provided sobering data on recent trends. The overall mortality rate, which accounts for increases in the total homeless population over the 6-year period from 2013 to 2018, increased each year from 1,382 per 100,000 to 1,875 deaths per 100,000, with the total number of deaths among people experiencing homelessness increasing each year from 536 in 2013 to 1,047 in 2018. The leading causes of death included coronary heart disease (22%) and unintentional drug and alcohol overdose (21%), indicating that there are opportunities for interventions to prevent premature deaths.

(References 19 & 20)

These significant adverse health impacts suffered by the homeless in the City and County of Los Angeles are consistent with the impacts identified by a well-established body of expert social science studies that document the significant adverse health and welfare impacts experienced by homeless persons in the United States and in other countries, which the homeless in the City and County experience as well. Some of that research has documented the following impacts upon homeless persons:

*Mortality Rates.* A study of the mortality rates of sheltered homeless people in New York City between 1987 and 1994 documented that homeless men died at a rate more than twice that of other residents of New York, and that homeless women died at a rate more than 3.7 times greater than other New York residents (Reference 10). A study conducted between 1985 and 1988 in Philadelphia found that the mortality rate among homeless persons in Philadelphia was nearly four times greater than for the general population (Reference 11). A review of five years of data between 2000 and 2005 in Glasgow, Scotland found that homelessness is, itself, is an independent risk factor for death, distinct from other specific causes (Reference 12).

*Access to Healthcare.* A 2003 nationwide survey of homeless persons documented that homeless adults reported substantial unmet needs for multiple types of health care (Reference 13). The report found 73 percent of the respondents reported at least one unmet health need, including an inability to obtain needed medical or surgical care (32%), prescription medications (36%), mental health care (21%), eyeglasses (41%), and dental care (41%) (*Id.*).

*AIDs Impacts.* A study of San Francisco residents diagnosed with AIDS from 1996 through 2006 and reported to the San Francisco Department of Public Health demonstrated that homeless persons with HIV/AIDS have greater morbidity and mortality, more hospitalizations, less use of

antiretroviral therapy, and worse medication adherence than HIV infected persons who are stably housed (Reference 14).

*Cancer Impacts.* A study of 28,000 current and formerly homeless individuals in Boston documented that homeless men saw a significantly higher cancer incident rate than expected compared to the general Massachusetts general population, and that homeless women and men experienced significantly higher cancer mortality rates than the Massachusetts general population (Reference 15).

### C. Unexpected and Sudden Dramatic Surge in Homelessness

A 2017 Rand Corporation study reported the County of Los Angeles as having the highest rate in the United States of unsheltered individuals who experience homelessness (Reference 16). The impacts of homelessness upon the homeless and upon the community, in terms of the danger to or loss of life, property, health and burden on public services is exacerbated in the City due the very size of the City’s homeless population. The homeless shelter crisis and the rise in homelessness are the type of emergency situations that led to adoption of AB 1197, an urgency statute that is deemed necessary for the immediate preservation of the public peace, health, or safety and for the critical necessity to address the shelter and homeless crisis within the City of Los Angeles.

Among other responses to homelessness, on April 17, 2018 the Mayor and City Council of the City of Los Angeles declared a Homeless shelter crisis (Reference 17). Following significant investment of resources by both the County and City, the 2018 Homeless Count showed progress in reducing homelessness, documenting a four percent overall decrease in the number of persons experiencing homelessness in LA County (Reference 18).

*Table 2 - 2018 Homeless Count Data Summary* presents the data revealed by the 2018 Homeless Count concerning the City of Los Angeles, as documented in the 2018 Data Summary at Reference 18.

<b>Table 2 2018 Homeless Count Data Summary</b>		
	<b>Number of Individuals</b>	<b>Change from 2017</b>
Sheltered Homeless	8,398	6% Decrease
Unsheltered Homeless	22,887	5.3% Decrease
Total Homeless Persons	31,285	5.5% Decrease

Despite these ongoing efforts and the initial progress shown in 2018, the 2019 Homeless Count, released in June 2019, unexpectedly has documented a dramatic increase in the number of individuals experiencing both sheltered and unsheltered homelessness in Reference 18 *Table 3 - 2019 Homeless Count Data Summary* presents the data revealed by the 2019 Homeless Count concerning the City of Los Angeles, as documented in the 2019 Data Summary as shown in Reference 18:

<b>Table 3 2019 Homeless Count Data Summary</b>		
	<b>Number of Individuals</b>	<b>Change from 2018</b>
Sheltered Homeless	8,944	5% Increase
Unsheltered Homeless	27,221	19% Increase
<b>Total Homeless Persons</b>	<b>36,165</b>	<b>16% Increase</b>

The unexpected and dramatic increase in homelessness in the City and County of Los Angeles identified in 2019, and attendant identified dangers to health, life, property and burden on public resources present an emergency situation as defined by CEQA.

**D. The Project is Exempt from CEQA Because it is Designed to Mitigate an Emergency**

Homelessness, as documented above, itself presents a clear and imminent danger, demanding immediate action to prevent or mitigate loss of, or damage to, life, health, property, or essential public services, meeting the definition of emergency provided by Public Resources Code section 21060.3. Homeless populations themselves suffer from adverse health impacts greater than the non-homeless population, including greater risk of death. Homeless individuals impose outsized impacts upon and use public safety and public health resources compared to the general population. The project is designed to mitigate all of these dangers.

The 2019 increase in homelessness in the City was both sudden and unexpected, further meeting the CEQA definition of an emergency set forth at Section 21060.3. Prior to June 2019, homelessness had been decreasing following County and City efforts, showing that the June 2019 dramatic increase in homeless persons was both unexpected and sudden. Moreover, CEQA Guideline section 15269(c) clarifies that a project to prevent a future emergency – such as the project which is designed to mitigate the impacts caused by the spike in homelessness -- need not be sudden or unexpected to qualify as statutorily exempt from CEQA compliance.

Finally, the fact that Section 21060.3 defines an emergency to include events beyond natural or geologic emergencies such as riots, accidents, or sabotage, shows that the dramatic increase of the already large Los Angeles-area homeless population is the type of emergency exempt from CEQA environmental review. The dramatic increase in homelessness identified in June 2019 and the attendant significant adverse public health, safety, and welfare impacts that are associated with homelessness would also be exacerbated by delaying the project in order to conduct a CEQA environmental review. The City's approval of the project to mitigate the unexpected and dramatic surge in homelessness is the type of emergency situation the legislature intended to fall outside the scope of CEQA review when it adopted Section 21080(b)(4). For these reasons, the project is statutorily exempt from compliance with CEQA as a specific action necessary to prevent or mitigate an emergency.
