Dear PLUM Committee members,

I am writing to give my support to the Cultural Heritage Commission's nomination of the Santa Fe Art Colony to receive Historical Protection. The buildings themselves and the working artists who inhabit those buildings are a vital part of Los Angeles' past and present. Hostility towards artists in favor of greedy developers does the city no favor. The Arts District was initially populated with working artists who require large, affordable industrial spaces for their work and livelihood. They are all being pushed out, or have been pushed out by developers who are building "luxury lofts" for non-artists.

Please listen to your conscience as you vote.

Thank you,

May Sun

Please save the Santa Fe Art Colony! We need artists to create!!
It is so very important to the world!

The Santa Fe Art Colony plays a central role in the LA community. Artists bring dollars to the city's economy and without affordable studios many artists are leaving. This is a unique community and we as a city need to put our significant arts history and support for a unique and rare community of artists ahead of one developer's desire to make a quick profit.
