COUNTY CLERK'S USE

CITY OF LOS ANGELES
OFFICE OF THE CITY CLERK
200 NORTH SPRING STREET, ROOM 395
LOS ANGELES, CALIFORNIA 90012
CALIFORNIA ENVIRONMENTAL QUALITY ACT
NOTICE OF EXEMPTION

(PRC Section 21152; CEQA Guidelines Section 15062)

Filing of this form is optional. If filed, the form shall be filed with the County Clerk, 12400 E. Imperial Highway, Norwalk, CA 90650, pursuant to Public Resources Code Section 21152(b) and CEQA Guidelines Section 15062. Pursuant to Public Resources Code Section 21167 (d), the posting of this notice starts a 35-day statute of limitations on court challenges to reliance on an exemption for the project. Failure to file this notice as provided above, results in the statute of limitations being extended to 180 days.

PARENT CASE NUMBER(S) / REQUESTED ENTITLEMENTS

DIR-2018-826-SPP/Project Permit Compliance Review

LEAD CITY AGENCY City of Los Angeles (Department of City Planning)		CASE NUMBER ENV-2018-827-CE
PROJECT TITLE 462 North Crane Boulevard		COUNCIL DISTRICT 1
PROJECT LOCATION (Street Address and Cross Streets and/or Attached Map) 462 North Crane Boulevard		<input type="checkbox"/> Map attached.
PROJECT DESCRIPTION: Construction of a new one (1)-story single-family dwelling that is 37 feet, 6 inches in height and contains 1,050 square feet of floor area and a detached 360-square-foot two (2)-car carport. The project does not involve removal of any Protected or Significant Trees.		<input checked="" type="checkbox"/> Additional page(s) attached.
NAME OF APPLICANT / OWNER: Fernando Ojeda-Rios III		
CONTACT PERSON (If different from Applicant/Owner above) Simon Storey	(AREA CODE) TELEPHONE NUMBER (323) 515-7930	EXT.
EXEMPT STATUS: (Check all boxes, and include all exemptions, that apply and provide relevant citations.) STATE CEQA STATUTE & GUIDELINES		
<input type="checkbox"/> STATUTORY EXEMPTION(S) Public Resources Code Section(s) _____		
<input checked="" type="checkbox"/> CATEGORICAL EXEMPTION(S) (State CEQA Guidelines Sec. 15301-15333 / Class 1-Class 3) CEQA Guideline Section 15303, Class 3		
<input type="checkbox"/> OTHER BASIS FOR EXEMPTION (E.g., CEQA Guidelines Section 15061(b)(3) or (b)(4) or Section 15378(b))		
JUSTIFICATION FOR PROJECT EXEMPTION: <input type="checkbox"/> Additional page(s) attached		
None of the exceptions to the Categorical Exemption under CEQA Guidelines 15300.2 applies to the proposed project. The proposed project will not result in significant cumulative impacts from successive projects of the same type in the same place. The project does not involve unusual circumstances. The proposed project will not damage scenic resources in a state scenic highway. The project site is not on a list compiled pursuant to Government Code Section 65962.5 related to hazardous waste sites. The project will not cause a substantial adverse change in the significance of a historical resource. The project is not located on or near an environmental resource that is precisely mapped, and officially adopted pursuant to federal, state or local law.		
<input checked="" type="checkbox"/> None of the exceptions in CEQA Guidelines Section 15300.2 to the categorical exemption(s) apply to the Project.		
<input type="checkbox"/> The project is identified in one or more of the list of activities in the City of Los Angeles CEQA Guidelines as cited in the justification.		
IF FILED BY APPLICANT, ATTACH CERTIFIED DOCUMENT ISSUED BY THE CITY PLANNING DEPARTMENT STATING THAT THE DEPARTMENT HAS FOUND THE PROJECT TO BE EXEMPT. If different from the applicant, the identity of the person undertaking the project.		
CITY STAFF USE ONLY:		
CITY STAFF NAME AND SIGNATURE Nuri Cho		STAFF TITLE City Planning Associate

JUSTIFICATION FOR PROJECT EXEMPTION CASE NO. ENV-2018-827-CE

The Department of City Planning determined that the State Guidelines for the implementation of the California Environmental Quality Act of 1970 designate the subject project as Categorically Exempt under Article 19, Section 15303, Class 3.

The project is for the construction of a new one (1)-story 1,050-square-foot single-family dwelling and a new detached 360-square-foot two (2)-car carport on a 5,621.9 square-foot interior lot located within the Mount Washington-Glassell Park Specific Plan.

The site is zoned R1-1 and has a General Plan Land Use Designation of Low Residential. As shown in the case file, the project is consistent with the applicable Northeast Los Angeles Community Plan designation and policies and all applicable zoning designations and regulations. The subject site is wholly within the City of Los Angeles, on a site that is approximately 0.13 acres. Lots adjacent to the subject site to the north and west are developed with single-family dwellings, while lots to the south and east are undeveloped. Protected Trees are defined in Protected Tree Ordinance (No. 177,404) as either Oak Trees, including the Valley Oak and California Live Oak or any other Oak indigenous to California but excluding the Scrub Oak, the Southern California Black Walnut, the Western Sycamore and the California Bay, which measure four inches or more in cumulative diameter. Significant Trees are defined in the Mt. Washington-Glassell Park Specific Plan as any tree which measures 12 inches or more in diameter at four and one-half feet above the natural grade at the base of the tree and/or more than 35 feet in height. There is one Protected Black Walnut Tree on site, and no Significant Trees, as identified in the Tree Report prepared by Arsen Margossian, Consulting Arborist (#WE-7233A) on January 31, 2018. No trees are proposed to be removed as part of the project, and the existing Protected Tree will be preserved per the Tree Report stamped by the Urban Forestry Division on April 20, 2018. The project will be subject to Regulatory Compliance Measures (RCMs), which require compliance with the City of Los Angeles Noise Ordinance, pollutant discharge, dewatering, stormwater regulations; and Best Management Practices for stormwater runoff. These RCMs will ensure the project will not have significant impacts on noise and water. Furthermore, the project does not exceed the threshold criteria established by the Los Angeles Department of Transportation (LADOT) for preparing a traffic study. Therefore, the project will not have any significant impacts to traffic. Interim thresholds were developed by DCP staff based on CalEEMod model runs relying on reasonable assumptions, consulting with South Coast Air Quality Management District (SCAQMD) staff, and surveying published air quality studies for which criteria air pollutants did not exceed the established SCAQMD construction and operational thresholds. The project site will be adequately served by all public utilities and services given that the construction of the addition will be on a

site developed with an existing single-family dwelling and surrounded by other developed properties.

There are six (6) Exceptions which must be considered in order to find a project exempt under 15303, Class 3: (a) Location; (b) Cumulative Impacts; (c) Significant Effect; (d) Scenic Highways; (e) Hazardous Waste Sites; and (f) Historical Resources.

While the subject site is located within an Urban Agriculture Incentive Zone, Very High Fire Hazard Severity Zone, a Landslide Area and Special Grading Area (BOE Basic Grid Map A-13372), specific RCMs in the City of Los Angeles regulate the grading and construction of projects in these particular types of "sensitive" locations and will reduce any potential impacts to less than significant. RCMs include requirements to conform to the California Building Code and the City's Landform Grading Manual (see attached Regulatory Compliance Measures). These RCMs have been historically proven to work to the satisfaction of the City Engineer to reduce any impacts from the specific environment the project is located. Thus, the location of the project will not result in a significant impact based on its location. There is not a succession of known projects of the same type and in the same place as the subject project. As mentioned, the project proposes the construction of 1,050-square-foot single family dwelling in an area zoned and designated for such development. Adjacent lots to the north and west are developed with single-family dwellings. The subject site is of a similar size and slope to nearby properties. The project proposes a Floor Area Ratio (FAR) of .19:1 on a site that is permitted to have a maximum FAR of .487:1. The proposed total floor area of 1,050 square feet and the proposed building height of 41 feet are not unusual for the vicinity of the subject site, and is similar in scope to other existing Low Residential land uses in the area. Thus, there are no unusual circumstances which may lead to a significant effect on the environment. Additionally, the only State Scenic Highway within the City of Los Angeles is the Topanga Canyon State Scenic Highway, State Route 27, which travels through a portion of Topanga State Park. The subject site is located 22.1 miles east of Topanga Canyon State Scenic Highway. Therefore the subject site will not create any impacts within a designated State Scenic Highway. Furthermore, according to Envirostor, the State of California's database of Hazardous Waste Sites, neither the subject site, nor any site in the vicinity, is identified as a hazardous waste site. The project site has not been identified as a historic resource by local or state agencies, and the project site has not been determined to be eligible for listing in the National Register of Historic Places, California Register of Historical Resources, the Los Angeles Historic-Cultural Monuments Register, and/or any local register; and was not found to be a potential historic resource based on the City's HistoricPlacesLA website or SurveyLA, the citywide survey of Los Angeles. Finally, the City does not choose to treat the site as a historic resource. Based on this, the project will not result in a substantial adverse change to the significance of a historic resource and this exception does not apply. Additionally, the adjoining parcel to the south is occupied by Southwest Museum of the American Indian, which is designated a National Register of Historic Places and a Los Angeles Historic-Cultural Monument; however, the applicant does not propose any construction on this adjoining parcel. Therefore, the project will not have a significant impact on the historical resource.

Regulatory Compliance Measures

In addition to the Mitigation Measures required of the project, and any proposed Project Design Features, the applicant shall also adhere to any applicable Regulatory Compliance Measures required by law. Listed below is a list of often required Regulatory Compliance Measures. Please note that requirements are determined on a case by case basis, and these are an example of the most often required Regulatory Compliance Measures.

AESTHETICS

- **Regulatory Compliance Measure RC-AE-1 (Hillside): Compliance with Baseline Hillside Ordinance.** To ensure consistency with the Baseline Hillside Ordinance, the project shall comply with the City's Hillside Development Guidelines, including but not limited to setback requirements, residential floor area maximums, height limits, lot coverage and grading restrictions.
- **Regulatory Compliance Measure RC-AE-2 (LA River): Compliance with provisions of the Los Angeles River Improvement Overlay District.** The project shall comply with development regulations set forth in Section 13.17.F of the Los Angeles Municipal Code as applicable, including but not necessarily limited to, landscaping, screening/fencing, and exterior site lighting.
- **Regulatory Compliance Measure RC-AE-3 (Vandalism): Compliance with provisions of the Los Angeles Building Code.** The project shall comply with all applicable building code requirements, including the following:
 - Every building, structure, or portion thereof, shall be maintained in a safe and sanitary condition and good repair, and free from, debris, rubbish, garbage, trash, overgrown vegetation or other similar material, pursuant to Municipal Code Section 91.8104.
 - The exterior of all buildings and fences shall be free from graffiti when such graffiti is visible from a street or alley, pursuant to Municipal Code Section 91.8104.15.
- **Regulatory Compliance Measure RC-AE-4 (Signage): Compliance with provisions of the Los Angeles Building Code.** The project shall comply with the Los Angeles Municipal Code Section 91.6205, including on-site signage maximums and multiple temporary sign restrictions, as applicable.
- **Regulatory Compliance Measure RC-AE-5 (Signage on Construction Barriers): Compliance with provisions of the Los Angeles Building Code.** The project shall

comply with the Los Angeles Municipal Code Section 91.6205, including but not limited to the following provisions:

- The applicant shall affix or paint a plainly visible sign, on publically accessible portions of the construction barriers, with the following language: "POST NO BILLS".
- Such language shall appear at intervals of no less than 25 feet along the length of the publically accessible portions of the barrier.
- The applicant shall be responsible for maintaining the visibility of the required signage and for maintaining the construction barrier free and clear of any unauthorized signs within 48 hours of occurrence.

AGRICULTURE and FORESTRY

AIR QUALITY

- **Regulatory Compliance Measure RC-AQ-1(Demolition, Grading and Construction Activities): Compliance with provisions of the SCAQMD District Rule 403.** The project shall comply with all applicable standards of the Southern California Air Quality Management District, including the following provisions of District Rule 403:
 - All unpaved demolition and construction areas shall be wetted at least twice daily during excavation and construction, and temporary dust covers shall be used to reduce dust emissions and meet SCAQMD District Rule 403. Wetting could reduce fugitive dust by as much as 50 percent.
 - The construction area shall be kept sufficiently dampened to control dust caused by grading and hauling, and at all times provide reasonable control of dust caused by wind.
 - All clearing, earth moving, or excavation activities shall be discontinued during periods of high winds (i.e., greater than 15 mph), so as to prevent excessive amounts of dust.
 - All dirt/soil loads shall be secured by trimming, watering or other appropriate means to prevent spillage and dust.
 - All dirt/soil materials transported off-site shall be either sufficiently watered or securely covered to prevent excessive amount of dust.
 - General contractors shall maintain and operate construction equipment so as to minimize exhaust emissions.
 - Trucks having no current hauling activity shall not idle but be turned off.
- **Regulatory Compliance Measure RC-AQ-2:** In accordance with Sections 2485 in Title 13 of the California Code of Regulations, the idling of all diesel-fueled commercial vehicles (weighing over 10,000 pounds) during construction shall be limited to five minutes at any location.
- **Regulatory Compliance Measure RC-AQ-3:** In accordance with Section 93115 in Title 17 of the California Code of Regulations, operation of any stationary, diesel-fueled, compression-ignition engines shall meet specified fuel and fuel additive requirements and emission standards.

- **Regulatory Compliance Measure RC-AQ-4:** The Project shall comply with South Coast Air Quality Management District Rule 1113 limiting the volatile organic compound content of architectural coatings.
- **Regulatory Compliance Measure RC-AQ-5:** The Project shall install odor-reducing equipment in accordance with South Coast Air Quality Management District Rule 1138.
- **Regulatory Compliance Measure RC-AQ-6:** New on-site facility nitrogen oxide emissions shall be minimized through the use of emission control measures (e.g., use of best available control technology for new combustion sources such as boilers and water heaters) as required by South Coast Air Quality Management District Regulation XIII, New Source Review.
- **Regulatory Compliance Measure RC-AQ-7 (Spray Painting): Compliance with provisions of the SCAQMD District Rule 403.** The project shall comply with all applicable rules of the Southern California Air Quality Management District, including the following:
 - All spray painting shall be conducted within an SCAQMD-approved spray paint booth featuring approved ventilation and air filtration system.
 - Prior to the issuance of a building permit, use of land, or change of use to permit spray painting, certification of compliance with SCAQMD air pollution regulations shall be submitted to the Department of Building and Safety.
- **Regulatory Compliance Measure RC-AQ-8 (Wireless Facilities):** If rated higher than 50 brake horsepower (bhp), permit required in accordance with SCAQMD Rule 1470 - Requirements for Stationary Diesel-Fueled Internal Combustion and Other Compression Initial Engines and SCAQMD Rule 1110.2 - Emissions from Gaseous- and Liquid- Field Engines.

BIOLOGY

- **(Duplicate of WQ Measure) Regulatory Compliance Measure RC-WQ-5 (Alteration of a State or Federal Watercourse):** The project shall comply with the applicable sections of the federal Clean Water Act (CWA) and California's Porter Cologne Water Quality Control Act (Porter Cologne). Prior to the issuance of any grading, use of land, or building permit which may affect an existing watercourse, the applicant shall consult with the following agencies and obtain all necessary permits and/or authorizations, to the satisfaction of the Department of Building and Safety. Compliance shall be determined through written communication from each jurisdictional agency, a copy of which shall be submitted to the Environmental Review case file for reference:
 - *United States Army Corps of Engineers.* The applicant shall obtain a Jurisdictional Determination (preliminary or approved), or a letter otherwise indicating that no permit is required. Contact: Aaron O. Allen, Chief - North Coast Branch, Regulatory Division, 805-585-2148.
 - *State Water Resources Control Board.* The applicant shall consult with the 401 Certification and Wetlands Unit and obtain all necessary permits and/or authorizations, or a letter otherwise indicating that no permit is required. Contact:

401 Certification and Wetlands Unit, Los Angeles Region, 320 W 4th Street, #200, Los Angeles, CA 90013, (213) 576-6600.

- *California Department of Fish and Wildlife.* The applicant shall consult with the Lake and Streambed Alteration Agreement Program and obtain a Streambed Alteration Agreement, or a letter otherwise indicating that no permit is required. Contact: LSAA Program, 4949 Viewridge Avenue, San Diego, CA 92123, (858) 636-3160.

CULTURAL RESOURCES

- **Regulatory Compliance Measure RC-CR-1 (Designated Historic-Cultural Resource): Compliance with United States Department of the Interior – National Park Service – Secretary of the Interior’s Standards for the Treatment of Historic Properties.** The project shall comply with the Secretary of the Interior’s Standards for Historical Resources, including but not limited to the following measures:
 - Prior to the issuance of any permit, the project shall obtain clearance from the Department of Cultural Affairs for the proposed work.
 - A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.
 - The historic character of a property shall be retained and preserved. The removal of historic material or alteration of features and spaces shall be avoided.
 - Each property shall be recognized as a physical record of its time, place and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other buildings, shall not be undertaken.
 - Most properties change over time; those changes that have acquired significance in their own right shall be retained and preserved.

- **Regulatory Compliance Measure RC-CR-2 (Archaeological):** If archaeological resources are discovered during excavation, grading, or construction activities, work shall cease in the area of the find until a qualified archaeologist has evaluated the find in accordance with federal, State, and local guidelines, including those set forth in California Public Resources Code Section 21083.2. Personnel of the proposed Modified Project shall not collect or move any archaeological materials and associated materials. Construction activity may continue unimpeded on other portions of the Project site. The found deposits would be treated in accordance with federal, State, and local guidelines, including those set forth in California Public Resources Code Section 21083.2.
 - Distinctive features, finishes and construction techniques or examples of skilled craftsmanship which characterize an historic property shall be preserved.
 - Deteriorated historic features shall be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive historic feature, the new feature shall match the old in design, color, texture, and other visual qualities, and where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.

- Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.
 - Significant archaeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.
 - New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.
 - New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.
- **Regulatory Compliance Measure RC-CR-3 (Paleontological):** If paleontological resources are discovered during excavation, grading, or construction, the City of Los Angeles Department of Building and Safety shall be notified immediately, and all work shall cease in the area of the find until a qualified paleontologist evaluates the find. Construction activity may continue unimpeded on other portions of the Project site. The paleontologist shall determine the location, the time frame, and the extent to which any monitoring of earthmoving activities shall be required. The found deposits would be treated in accordance with federal, State, and local guidelines, including those set forth in California Public Resources Code Section 21083.2.
 - **Regulatory Compliance Measure CR-4 (Human Remains):** If human remains are encountered unexpectedly during construction demolition and/or grading activities, State Health and Safety Code Section 7050.5 requires that no further disturbance shall occur until the County Coroner has made the necessary findings as to origin and disposition pursuant to California Public Resources Code (PRC) Section 5097.98. In the event that human remains are discovered during excavation activities, the following procedure shall be observed:
 - Stop immediately and contact the County Coroner:
1104 N. Mission Road
Los Angeles, CA 90033
323-343-0512 (8 a.m. to 5 p.m. Monday through Friday) or
323-343-0714 (After Hours, Saturday, Sunday, and Holidays)

If the remains are determined to be of Native American descent, the Coroner has 24 hours to notify the Native American Heritage Commission (NAHC).

The NAHC will immediately notify the person it believes to be the most likely descendent of the deceased Native American.

- The most likely descendent has 48 hours to make recommendations to the owner, or representative, for the treatment or disposition, with proper dignity, of the human remains and grave goods.

- If the owner does not accept the descendant's recommendations, the owner or the descendent may request mediation by the NAHC.

GEOLOGY AND SOILS

- **Regulatory Compliance Measure RC-GEO-1 (Seismic):** The design and construction of the project shall conform to the California Building Code seismic standards as approved by the Department of Building and Safety.
- **Regulatory Compliance Measure RC-GEO-2 (Hillside Grading Area):** The grading plan shall conform with the City's Landform Grading Manual guidelines, subject to approval by the Advisory Agency and the Department of Building and Safety's Grading Division. Appropriate erosion control and drainage devices shall be provided to the satisfaction of the Building and Safety Department. These measures include interceptor terraces, berms, vee-channels, and inlet and outlet structures, as specified by Section 91.7013 of the Building Code, including planting fast-growing annual and perennial grasses in areas where construction is not immediately planned.
- **Regulatory Compliance Measure RC-GEO-3 (Landslide Area):** Prior to the issuance of grading or building permits, the applicant shall submit a geotechnical report, prepared by a registered civil engineer or certified engineering geologist, to the Department of Building and Safety, for review and approval. The geotechnical report shall assess potential consequences of any landslide and soil displacement, estimation of settlement, lateral movement or reduction in foundation soil-bearing capacity, and discuss mitigation measures that may include building design consideration. Building design considerations shall include, but are not limited to:
 - ground stabilization
 - selection of appropriate foundation type and depths
 - selection of appropriate structural systems to accommodate anticipated displacements or any combination of these measuresThe project shall comply with the conditions contained within the Department of Building and Safety's Geology and Soils Report Approval Letter for the proposed project, and as it may be subsequently amended or modified.
- **Regulatory Compliance Measure RC-GEO-4 (Liquefaction Area):** The project shall comply with the Uniform Building Code Chapter 18. Division 1 Section 1804.5 Liquefaction Potential and Soil Strength Loss. Prior to the issuance of grading or building permits, the applicant shall submit a geotechnical report, prepared by a registered civil engineer or certified engineering geologist, to the Department of Building and Safety, for review and approval. The geotechnical report shall assess potential consequences of any liquefaction and soil strength loss, estimation of settlement, lateral movement or reduction in foundation soil-bearing capacity, and discuss mitigation measures that may include building design consideration. Building design considerations shall include, but are not limited to:
 - ground stabilization
 - selection of appropriate foundation type and depths
 - selection of appropriate structural systems to accommodate anticipated displacements or any combination of these measures.

The project shall comply with the conditions contained within the Department of Building and Safety's Geology and Soils Report Approval Letter for the proposed project, and as it may be subsequently amended or modified.

- **Regulatory Compliance Measure RC-GEO-5 (Subsidence Area):** Prior to the issuance of building or grading permits, the applicant shall submit a geotechnical report prepared by a registered civil engineer or certified engineering geologist to the written satisfaction of the Department of Building and Safety. The geotechnical report shall assess potential consequences of any subsidence and soil strength loss, estimation of settlement, lateral movement or reduction in foundation soil-bearing capacity, and discuss mitigation measures that may include building design consideration. Building design considerations shall include, but are not limited to: ground stabilization, selection of appropriate foundation type and depths, selection of appropriate structural systems to accommodate anticipated displacements or any combination of these measures. The project shall comply with the conditions contained within the Department of Building and Safety's Geology and Soils Report Approval Letter for the proposed project, and as it may be subsequently amended or modified.
- **Regulatory Compliance Measure RC-GEO-6 (Expansive Soils Area):** Prior to the issuance of grading or building permits, the applicant shall submit a geotechnical report, prepared by a registered civil engineer or certified engineering geologist, to the Department of Building and Safety, for review and approval. The geotechnical report shall assess potential consequences of any soil expansion and soil strength loss, estimation of settlement, lateral movement or reduction in foundation soil-bearing capacity, and discuss mitigation measures that may include building design consideration. Building design considerations shall include, but are not limited to: ground stabilization, selection of appropriate foundation type and depths, selection of appropriate structural systems to accommodate anticipated displacements or any combination of these measures. The project shall comply with the conditions contained within the Department of Building and Safety's Geology and Soils Report Approval Letter for the proposed project, and as it may be subsequently amended or modified.
- **Regulatory Compliance Measure RC-GHG-1 (Green Building Code):** In accordance with the City of Los Angeles Green Building Code (Chapter IX, Article 9, of the Los Angeles Municipal Code), the Project shall comply with all applicable mandatory provisions of the 2013 Los Angeles Green Code and as it may be subsequently amended or modified.

HAZARDS AND HAZARDOUS MATERIALS

- **Regulatory Compliance Measure RC-HAZ-1: Explosion/Release (Existing Toxic/Hazardous Construction Materials)**
 - **(Asbestos)** Prior to the issuance of any permit for the demolition or alteration of the existing structure(s), the applicant shall provide a letter to the Department of Building and Safety from a qualified asbestos abatement consultant indicating that no Asbestos-Containing Materials (ACM) are present in the building. If ACMs are found to be present, it will need to be abated in compliance with the South Coast Air Quality Management District's Rule 1403 as well as all other applicable State and Federal rules and regulations.

- **(Lead Paint)** Prior to issuance of any permit for the demolition or alteration of the existing structure(s), a lead-based paint survey shall be performed to the written satisfaction of the Department of Building and Safety. Should lead-based paint materials be identified, standard handling and disposal practices shall be implemented pursuant to OSHA regulations.
- **(Polychlorinated Biphenyl – Commercial and Industrial Buildings)** Prior to issuance of a demolition permit, a polychlorinated biphenyl (PCB) abatement contractor shall conduct a survey of the project site to identify and assist with compliance with applicable state and federal rules and regulation governing PCB removal and disposal.
- **Regulatory Compliance Measure RC-HAZ-2: Explosion/Release (Methane Zone):** As the Project Site is within a methane zone, prior to the issuance of a building permit, the Site shall be independently analyzed by a qualified engineer, as defined in Ordinance No. 175,790 and Section 91.7102 of the LAMC, hired by the Project Applicant. The engineer shall investigate and design a methane mitigation system in compliance with the LADBS Methane Mitigation Standards for the appropriate Site Design Level which will prevent or retard potential methane gas seepage into the building. The Applicant shall implement the engineer's design recommendations subject to DOGGR, LADBS and LAFD plan review and approval.
- **Regulatory Compliance Measure RC-HAZ-3: Explosion/Release (Soil Gases):** During subsurface excavation activities, including borings, trenching and grading, OSHA worker safety measures shall be implemented as required to preclude any exposure of workers to unsafe levels of soil-gases, including, but not limited to, methane.
- **Regulatory Compliance Measure RC-HAZ-4 Listed Sites (Removal of Underground Storage Tanks):** Underground Storage Tanks shall be decommissioned or removed as determined by the Los Angeles City Fire Department Underground Storage Tank Division. If any contamination is found, further remediation measures shall be developed with the assistance of the Los Angeles City Fire Department and other appropriate State agencies. Prior to issuance of a use of land or building permit, a letter certifying that remediation is complete from the appropriate agency (Department of Toxic Substance Control or the Regional Water Quality Control Board) shall be submitted to the decision maker.
- **Regulatory Compliance Measure RC-HAZ-5 (Hazardous Materials Site):** Prior to the issuance of any use of land, grading, or building permit, the applicant shall obtain a sign-off from the Fire Department indicating that all on-site hazardous materials, including contamination of the soil and groundwater, have been suitably remediated, or that the proposed project will not impede proposed or on-going remediation measures.

HYDROLOGY AND WATER QUALITY

- **Regulatory Compliance Measure RC-WQ-1: National Pollutant Discharge Elimination System General Permit.** Prior to issuance of a grading permit, the Applicant shall obtain coverage under the State Water Resources Control Board National Pollutant Discharge Elimination System General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities (Order No. 2009-0009-DWQ, National

Pollutant Discharge Elimination System No. CAS000002) (Construction General Permit) for Phase 1 of the proposed Modified Project. The Applicant shall provide the Waste Discharge Identification Number to the City of Los Angeles to demonstrate proof of coverage under the Construction General Permit. A Storm Water Pollution Prevention Plan shall be prepared and implemented for the proposed Modified Project in compliance with the requirements of the Construction General Permit. The Storm Water Pollution Prevention Plan shall identify construction Best Management Practices to be implemented to ensure that the potential for soil erosion and sedimentation is minimized and to control the discharge of pollutants in stormwater runoff as a result of construction activities.

- **Regulatory Compliance Measure RC-WQ-2: Dewatering.** If required, any dewatering activities during construction shall comply with the requirements of the Waste Discharge Requirements for Discharges of Groundwater from Construction and Project Dewatering to Surface Waters in Coastal Watersheds of Los Angeles and Ventura Counties (Order No. R4-2008-0032, National Pollutant Discharge Elimination System No. CAG994004) or subsequent permit. This will include submission of a Notice of Intent for coverage under the permit to the Los Angeles Regional Water Quality Control Board at least 45 days prior to the start of dewatering and compliance with all applicable provisions in the permit, including water sampling, analysis, and reporting of dewatering-related discharges.
- **Regulatory Compliance Measure RC-WQ-3: Low Impact Development Plan.** Prior to issuance of grading permits, the Applicant shall submit a Low Impact Development Plan and/or Standard Urban Stormwater Mitigation Plan to the City of Los Angeles Bureau of Sanitation Watershed Protection Division for review and approval. The Low Impact Development Plan and/or Standard Urban Stormwater Mitigation Plan shall be prepared consistent with the requirements of the Development Best Management Practices Handbook.
- **Regulatory Compliance Measure RC-WQ-4: Development Best Management Practices.** The Best Management Practices shall be designed to retain or treat the runoff from a storm event producing 0.75 inch of rainfall in a 24-hour period, in accordance with the Development Best Management Practices Handbook Part B Planning Activities. A signed certificate from a licensed civil engineer or licensed architect confirming that the proposed Best Management Practices meet this numerical threshold standard shall be provided.
- **Regulatory Compliance Measure RC-WQ-5 (Alteration of a State or Federal Watercourse):** The project shall comply with the applicable sections of the federal Clean Water Act (CWA) and California's Porter Cologne Water Quality Control Act (Porter Cologne). Prior to the issuance of any grading, use of land, or building permit which may affect an existing watercourse, the applicant shall consult with the following agencies and obtain all necessary permits and/or authorizations, to the satisfaction of the Department of Building and Safety. Compliance shall be determined through written communication from each jurisdictional agency, a copy of which shall be submitted to the Environmental Review case file for reference:
 - *United States Army Corps of Engineers.* The applicant shall obtain a Jurisdictional Determination (preliminary or approved), or a letter otherwise indicating that no permit is required. Contact: Aaron O. Allen, Chief - North Coast Branch, Regulatory Division, 805-585-2148.

- *State Water Resources Control Board.* The applicant shall consult with the 401 Certification and Wetlands Unit and obtain all necessary permits and/or authorizations, or a letter otherwise indicating that no permit is required. Contact: 401 Certification and Wetlands Unit, Los Angeles Region, 320 W 4th Street, #200, Los Angeles, CA 90013, (213) 576-6600.
- *California Department of Fish and Wildlife.* The applicant shall consult with the Lake and Streambed Alteration Agreement Program and obtain a Streambed Alteration Agreement, or a letter otherwise indicating that no permit is required. Contact: LSAA Program, 4949 Viewridge Avenue, San Diego, CA 92123, (858) 636-3160.
- **Regulatory Compliance Measure RC-WQ-6 (Flooding/Tidal Waves):** The project shall comply with the requirements of the Flood Hazard Management Specific Plan, Ordinance No. 172081 effective 7/3/98.

LAND USE AND PLANNING

- **Regulatory Compliance Measure RC-LU-1 (Slope Density):** The project shall not exceed the maximum density permitted in Hillside Areas, as calculated by the formula set forth in Los Angeles Municipal Code Section 17.05-C (for tracts) or 17.50-E (for parcel maps).

MINERAL RESOURCES

NOISE

- **Regulatory Compliance Measure RC-NO-1 (Demolition, Grading, and Construction Activities):** The project shall comply with the City of Los Angeles Noise Ordinance and any subsequent ordinances, which prohibit the emission or creation of noise beyond certain levels at adjacent uses unless technically infeasible.

POPULATION AND HOUSING

- **New Regulatory Compliance Measure RC-PH-1 (Tenant Displacement):**
 - **Apartment Converted to Condominium** - Prior to final map recordation, and pursuant to the provisions of Section 12.95.2-G and 47.06 of the Los Angeles Municipal Code (LAMC), a tenant relocation plan shall be submitted to the Los Angeles Housing Department for review and approval.
 - **Apartment Demolition** - Prior to the issuance of a demolition permit, and pursuant to the provisions of Section 47.07 of the Los Angeles Municipal Code, a tenant relocation plan shall be submitted to the Los Angeles Housing Department for review and approval.
 - **Mobile Home Park Closure or Conversion to Different Use** Prior to the issuance of any permit or recordation, and pursuant to the provisions of Section 47.08 and 47.09 of the Los Angeles Municipal Code, a tenant relocation plan and mobile home park closure impact report shall be submitted to the Los Angeles Housing Department for review and approval.

PUBLIC SERVICES

Schools

- **Regulatory Compliance Measure RC-PS-1 (Payment of School Development Fee)** Prior to issuance of a building permit, the General Manager of the City of Los Angeles, Department of Building and Safety, or designee, shall ensure that the Applicant has paid all applicable school facility development fees in accordance with California Government Code Section 65995.

Parks

- **Regulatory Compliance Measure RC-PS-2 (Increased Demand For Parks Or Recreational Facilities):**
 - (*Subdivision*) Pursuant to Section 17.12-A or 17.58 of the Los Angeles Municipal Code, the applicant shall pay the applicable Quimby fees for the construction of dwelling units.
 - (*Apartments*) Pursuant to Section 21.10 of the Los Angeles Municipal Code, the applicant shall pay the Dwelling Unit Construction Tax for construction of apartment buildings.
- **Regulatory Compliance Measure RC-PS-3 (Increase Demand For Parks Or Recreational Facilities – Zone Change)** Pursuant to Section 12.33 of the Los Angeles Municipal Code, the applicant shall pay the applicable fees for the construction of dwelling units.

RECREATION

See RC measures above under Parks.

TRANSPORTATION AND TRAFFIC

- **Regulatory Compliance Measure RC-TT-1 (Increased Vehicle Trips/Congestion - West Side Traffic Fee)** Prior to issuance of a Building Permit, the applicant shall pay a traffic impact fee to the City, based on the requirements of the West Los Angeles Traffic Improvement and Mitigation Specific Plan (WLA TIMP).

PUBLIC UTILITIES AND SERVICE SYSTEMS

Water Supply

- **Regulatory Compliance Measure RC-WS-1 (Fire Water Flow)** The Project Applicant shall consult with the LADBS and LAFD to determine fire flow requirements for the Proposed Project, and will contact a Water Service Representative at the LADWP to order a SAR. This system hydraulic analysis will determine if existing LADWP water supply facilities can provide the proposed fire flow requirements of the Project. If water main or infrastructure upgrades are required, the Applicant would pay for such upgrades, which would be constructed by either the Applicant or LADWP.

- **Regulatory Compliance Measure RC-WS-2 (Green Building Code):** The Project shall implement all applicable mandatory measures within the LA Green Building Code that would have the effect of reducing the Project's water use.
- **Regulatory Compliance Measure RC-WS-3 (New Carwash):** The applicant shall incorporate a water recycling system to the satisfaction of the Department of Building and Safety.
- **Regulatory Compliance Measure RC-WS-4 (Landscape)** The Project shall comply with Ordinance No. 170,978 (Water Management Ordinance), which imposes numerous water conservation measures in landscape, installation, and maintenance (e.g., use drip irrigation and soak hoses in lieu of sprinklers to lower the amount of water lost to evaporation and overspray, set automatic sprinkler systems to irrigate during the early morning or evening hours to minimize water loss due to evaporation, and water less in the cooler months and during the rainy season).

Energy

- **Regulatory Compliance Measure RC-EN-1(Green Building Code):** The Project shall implement all applicable mandatory measures within the LA Green Building Code that would have the effect of reducing the Project's energy use.

Solid Waste

- **Regulatory Compliance Measure RC-SW-1 (Designated Recycling Area)** In compliance with Los Angeles Municipal Code, the proposed Modified Project shall provide readily accessible areas that serve the entire building and are identified for the depositing, storage, and collection of nonhazardous materials for recycling, including (at a minimum) paper, corrugated cardboard, glass, plastics, and metals.
- **Regulatory Compliance Measure RC-SW-2 (Construction Waste Recycling)** In order to meet the diversion goals of the California Integrated Waste Management Act and the City of Los Angeles, which will total 70 percent by 2013, the Applicant shall salvage and recycle construction and demolition materials to ensure that a minimum of 70 percent of construction-related solid waste that can be recycled is diverted from the waste stream to be landfilled. Solid waste diversion would be accomplished through the on-site separation of materials and/or by contracting with a solid waste disposal facility that can guarantee a minimum diversion rate of 70 percent. In compliance with the Los Angeles Municipal Code, the General Contractor shall utilize solid waste haulers, contractors, and recyclers who have obtained an Assembly Bill (AB) 939 Compliance Permit from the City of Los Angeles Bureau of Sanitation.
- **Regulatory Compliance Measure RC-SW-3 (Commercial/Multifamily Mandatory Recycling)** In compliance with AB341, recycling bins shall be provided at appropriate locations to promote recycling of paper, metal, glass and other recyclable material. These bins shall be emptied and recycled accordingly as a part of the Proposed Project's regular solid waste disposal program. The Project Applicant shall only contract for waste disposal services with a company that recycles solid waste in compliance with AB341.
