**Council File No:** 20-0063

**Comments for Public Posting:** (4) 20-0063 Motion (Bonin – Buscaino) supporting local designation of U.S. Bicycle Routes 95 and 66 in the City of Los Angeles, directing LADOT to install wayfinding signage along designated routes, to report with recommendations to further enhance bicycle infrastructure and promote bicycle tourism along the designated routes, and to install sharrows and Bikes May Use Full Lane signs to close gaps in existing bicycle facilities along the designated routes. Thank you to Bonin and Buscaino for supporting this! As a voting constituent, please vote YES! Los Angeles is the only hold out for completing USBR 66 and 95- this is shameful and embarrassing. I walk everyday, ride a bicycle local errands/commuting and occasionally drive a car as well. Travelling by bicycle and walking is the best way to view, experience and spend money as a tourist or local resident. Thousands of people from around the world tour by bicycle every year and need a safe complete convenient route to navigate the great city of Los Angeles. This is the whole point of the USBR network. Thank you
