Comments for Public Posting: I support this motion and anything can could protect low income renters and section 8 renters from losing thier housing. More than 40,000 people are homeless on the street every night and to assist this group of Angelinos from living on the streets would make a huge statement to community stakeholder to voters that they matter. I urge the city council to vote in favor of placing protections in place so that these Angelinos. These tenants are protected. Please.
