Subject: PLUM Committee - Medical Marijuana Facilities

*Council File No.
08-0923*

I am unable to attend the meeting tomorrow, January 27th, but I would like my comments read into public comment. If you need additional information for this to be done - please let me know. Your help is appreciated.

I understand the need for medical marijuana facilities however based on the increased crime that is becoming associated with these sites, I think some thought is needed as to placement. Like bars and other businesses that have location restrictions, I do believe that medical marijuana facilities have no place being allowed near school facilities and there should be a limit as to how many are allowed per square mile. For example in our neighborhood we have three within a few blocks of one another.

Thank you.
