TO: LOS ANGELES CITY COUNCIL MEMBERS
RE: DRAFT RESOLUTION OF HOLLYWOOD COMMUNITY PLAN
CPC - 2005 - 6082 - CPU, CPU 1997 - 43 CPU
APPROVED BY CITY PLANNING COMMISSION

Date 3/27/12
Submitted in PLUM Committee
Council File No. 12-0303
Item # 5
Dept. Comm from Public

DEAR CITY COUNCIL MEMBERS:

We, the residents of Melrose Hill HPOZ and the immediately adjacent properties, request lower density than proposed. The proposed FAR 1.5:1 from our current .5 :1 is 3 times higher and would negatively impact our neighborhood. The proposed commercial designations are grossly out of scale. There are no alleys between the residential and commercial properties and extended height limits will block out sunlight for most of the year. It would destroy backyard privacy and increase traffic in an already beleaguered area.

We are once more requesting the .05:1 and Q conditions to remain or a maximum of 1.0:1 density surrounding the neighborhood and no RAS 4. *OR RA*

The 2000 SCAG figures that are the baseline for the proposed new densities are theoretical. They do not reflect the reality of an 8.9% decrease population in this area as shown in the recent census figures. Reality is brushed aside in this plan in favor of speculative growth. In the proposed Hollywood Plan, calculations show the following increases:

Santa Monica Boulevard - 600% Increase
Western Avenue - 250% Increase
Melrose Avenue - 300% Increase

As we understand from the Planning Dept. - the goal was to increase density by 4.5% over all. As you can see, the above figures grossly exceed the stated intent.

The Neighborhood Council Area is about 100 acres. These increases show an impact of immense proportion. Add new limited review, less notification to neighbors, bonus credits that can make a project "By Right" and thus eliminate many quality of life requirements. We ask that our HPOZ Board be notified of any development adjacent to HPOZ properties.

Once again, we request you to instruct revision of this planning.

We enthusiastically support the expansion of the HPOZ, the Hollywood Freeway Central Park and the Santa Monica Boulevard and Melrose Avenue Pedestrian-oriented design standards.

Sincerely,

APPROVED BY CITY PLANNING COMMISSION

DEAR CITY COUNCIL MEMBERS:

We, the residents of Melrose Hill HPOZ and the immediately adjacent properties, request lower density than proposed. The proposed FAR 1.5:1 from our current .5 :1 is 3 times higher and would negatively impact our neighborhood. The proposed commercial designations are grossly out of scale. There are no alleys between the residential and commercial properties and extended height limits will block out sunlight for most of the year. It would destroy backyard privacy and increase traffic in an already beleaguered area.

We are once more requesting the .05:1 and Q conditions to remain or a maximum of 1.0:1 density surrounding the neighborhood and no RAS 4.

The 2000 SCAG figures that are the baseline for the proposed new densities are theoretical. They do not reflect the reality of an 8.9% decrease population in this area as shown in the recent census figures. Reality is brushed aside in this plan in favor of speculative growth. In the proposed Hollywood Plan, calculations show the following increases:

Santa Monica Boulevard -	600% Increase
Western Avenue -	250% Increase
Melrose Avenue -	300% Increase

As we understand from the Planning Dept. - the goal was to increase density by 4.5% over all. As you can see, the above figures grossly exceed the stated intent.

The Neighborhood Council Area is about 100 acres. These increases show an impact of immense proportion. Add new limited review, less notification to neighbors, bonus credits that can make a project "By Right" and thus eliminate many quality of life requirements. We ask that our HPOZ Board be notified of any development adjacent to HPOZ properties.

Once again, we request you to instruct revision of this planning.

We enthusiastically support the expansion of the HPOZ, the Hollywood Freeway Central Park and the Santa Monica Boulevard and Melrose Avenue Pedestrian-oriented design standards.

Sincerely,
