

Your **PUBLIC SAFETY COMMITTEE**

reports as follows:

PUBLIC SAFETY COMMITTEE REPORT relative to the selection of the Raytheon Company to provide a comprehensive digital in-car video system for the Police Department.

Recommendations for Council action:

1. AUTHORIZE the Chief of Police, or designee, to enter into contract negotiations with the Raytheon Company to provide the Police Department with a comprehensive Digital In-Car Video System, and to report to Council in 90 days with a request for authority to execute the final contract.
2. DIRECT the Police Department to report to the Public Safety Committee in 60 days relative to:
 - a. How the Department intends to use recorded video, and whether it will be private or made available for public use, used for investigations, and/or made available for discovery purposes.
 - b. A written draft policy regarding the use of recorded video content not relevant to a call for service that can be taken out of context and used for disciplinary action against a police officer.
 - c. The Department's video storage policy, and draft recommendations for defining video retention period of time for training, code three, use of force, and other uses.
 - d. Draft policy recommendations for what police officers are required to do if an in-car video camera is not operative.

Fiscal Impact Statement: None submitted by the Police Department. Neither the City Administrative Officer nor the Chief Legislative Analyst has completed a financial analysis of this report.

Community Impact Statement: None submitted.

SUMMARY

In a report to the Board of Police Commissioners dated May 4, 2012 (attached to the Council file), the Police Department recommends the selection of Raytheon Company to provide the Department with a comprehensive Digital In-Car Video System. Top proposers were asked to install demonstration systems in police patrol vehicles. The demonstration systems were installed, demonstrations of the systems were conducted, and presentations were made by the four proposers to the evaluation team. In addition, a comprehensive practical field test of the demonstration systems was conducted. Testing included verifying and reviewing the

requirements published in the Request for Proposals, video and audio quality, overall functionality, video management, and ease of use for field officers.

The Police Department goes on to discuss Raytheon's proposal and implementation. On May 15, 2012, the Board of Police Commissioners approved Police Department's recommendation to select Raytheon to install digital in-car video.

At its special meeting held November 16, 2012, the Public Safety Committee discussed this matter with representatives of the Police Department. The Department representative stated that the proposed contract is for in-car video for the Department's Central Bureau. Approximately \$2.5 million in existing funding has been identified for this use. As technology improves, potential cost reductions may be found during contract negotiations.

According to the Committee Chair, funding for the contract can be considered at the time the Board of Police Commissioners returns to the Public Safety Committee for approval of the actual contract award. It is anticipated that the Police Department will be able to report back in ninety days with the final contract.

The Committee recommended that Council authorize the Chief of Police to enter negotiations with Raytheon, as recommended by the Board of Police Commissioners. Committee further recommended that Council direct the Police Department to report back in 60 days relative to the use and retention of recorded video, and policy instructions for what police officers should do in the event the in-car video camera in their patrol cars is not operating.

Respectfully submitted,

PUBLIC SAFETY COMMITTEE
