TRANSPORTATION

MOTION

JUL 31 2012

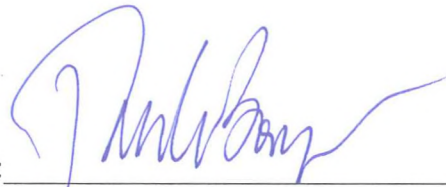

The Miracle Mile District in Los Angeles houses one of the largest concentrations of people within the City. There have been two recent incidents and one fatality at the intersection of 6th Street and Hauser Boulevard.

This area in the Miracle Mile is known as a pedestrian neighborhood due to the destinations that surround it: the Grove, Farmer's Market, La Brea Tar Pits and the Los Angeles County Art Museum. It is imperative that the City look assess the current traffic measures to ensure the continued safety of the residents and visitors. Park La Brea Resident's Association and Management would like to see channelization at this intersection.

I THEREFORE MOVE that the Department of Transportation be requested to report with recommendations for implementing traffic calming measures as well as conducting a channelization study on 6th Street between Fairfax and LaBrea Avenues in order to address the emerging safety issues.

I FURTHER MOVE that the Department of Transportation review the Mid City West Neighborhood Council's report on traffic calming and bike lanes as part of the process and consider the recommendations in the report back.
