MOTION

3rd Street is a major thorough fare for vehicles moving between Downtown and the West Side. During many times during the day, traffic is congested on 3rd Street due to the capacity of the existing roadways and its lanes.

Mobility and channelization are key to easing the traffic congestion that is caused by the increase in tourists and Angelenos driving to the area. By utilizing the ability to add lanes is important to reducing traffic congestion.

I THEREFORE MOVE that the Department of Transportation be requested to report on the feasibility of adding a "right turn only" lane at Grove Drive and 3rd Street for west bound travel on 3rd Street in order to alleviate traffic congestion by increasing capacity of the roadway and realignment of the lanes.
