Tue, Apr 9, 2013 at 10:50 AM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

**Ben Cornwell** <cornwell.ben@gmail.com>

Tue, Apr 9, 2013 at 10:31 AM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

Gail Meikle <jgst4@ca.rr.com>

Tue, Apr 9, 2013 at 8:44 AM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

Rodolfo ALVAREZ <RodolfoAlvarez123@gmail.com>

Wed, Apr 10, 2013 at 2:54 AM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

**Mark Kleiman** <mkleiman@quitam.org>

Tue, Apr 9, 2013 at 7:58 PM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

**Lillian Laskin** <lillianlaskin@gmail.com>

Tue, Apr 9, 2013 at 5:25 PM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

Charles Agege <COAGEGE@aol.com>

Tue, Apr 9, 2013 at 4:10 PM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

**Shawna Albright** <Heyitsshawna1969@yahoo.com>

Tue, Apr 9, 2013 at 3:10 PM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

---

**Andrew Gross Gaitan** <andrew.gaitan@seiu-usww.org>

Wed, Apr 10, 2013 at 9:30 PM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

**marx gutierrez** <marx.gutierrez@seiu-usww.org>

Wed, Apr 10, 2013 at 1:19 PM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

Lisa Hughes &lt;lisa@steinbrunhughes.com&gt;

Tue, Apr 9, 2013 at 12:28 PM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

---

**Paulette Nuttle** <pnuttle@ca.rr.com>

Tue, Apr 9, 2013 at 11:29 AM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

---

**Thomas Hughes** <tomhughesmcf@yahoo.com>

Tue, Apr 9, 2013 at 7:10 AM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

**Margaret Chin** <peggychin@verizon.net>

Mon, Apr 8, 2013 at 11:15 PM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

---

**Reza Akef** <reza@metrocap.biz>

Mon, Apr 8, 2013 at 11:02 PM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

**Danna Cope** <dannacope@gmail.com>

Thu, Apr 11, 2013 at 1:36 AM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

## Vote Yes to Modernize LAX, Vote NO to move the north runways

1 message

siglinde Vitacek &lt;vitacekl@yahoo.com&gt;

Wed, Apr 10, 2013 at 4:11 PM

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarnageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carnageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX.

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.
