To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarmageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carmageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarmageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carmageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarmageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carmageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarmageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carmageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

To: andrea.mills@lacity.org, Lisa.Schechter@lacity.org, councilman.rosendahl@lacity.org, doane.liu@lacity.org, rebecca.valdez@lacity.org, Francine.Godoy@lacity.org, John.S.Lee@lacity.org, Michael.Espinosa@lacity.org, jim.bickhart@lacity.org, Lisa.Pinto@mail.house.gov, stopendlesscarmageddon@gmail.com

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carmageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carmageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.

Los Angeles needs a world-class, modern, and competitive airport. That is why I urge you to support two economically and environmentally superior alternatives to modernize LAX and reject a recommendation from Los Angeles World Airport (LAWA) to move the North runways 260 feet and reconfigure parts of Lincoln Blvd and Sepulveda Blvd.

With a price tag of over \$500 million just to move the runways, LAWA's plan makes no economic sense: there is no justification in terms of safety, efficiency, job creation or environmental benefits. Worse, it could cause lengthy construction disruptions to this vital north/south transportation corridor, resulting in carmageddon-like conditions across the region.

Instead, I urge you to immediately approve two economically and environmentally superior alternatives to modernize LAX - "Alternative 2" and "Alternative 9" which would:

- Improve and Modernize Terminals 1, 2 and 3
- Connect the Crenshaw and Green Lines directly to the LAX Terminal Area
- Create an Automated People Mover to transport passengers to the terminal
- Create a new transit hub that would connect the Green line, regional transit buses, and the proposed Automated People Mover
- Develop a Consolidated Car Rental Facility at Manchester Square
- Install Runway Status Lights at all runway intersections - a proven and effective runway safety improvement that will make an already safe North Runway complex even safer.
- Fully staff the FAA Control Tower with certified air traffic controllers. Today, there are only 37 certified controllers. The National Air Traffic Controllers Association has recommended a tower staff of at least 47 certified controllers to ensure safety at LAX

I urge you to vote for these recommendations and against moving the North runways so that we can modernize LAX, keep the airport competitive, and provide long-term, good paying jobs - all without needlessly impacting Angeleno's quality of life.

Thank you.
