ENERGY & ENVIRONMENT
PLANNING & LAND USE MANAGEMENT

MOTION RULES, ELECTIONS & INTERGOVERNMENTAL RELATIONS

The City of Los Angeles is home to thousands of active oil wells and the history of oil and gas production in LA is well documented. Consequently, the City Council must often consider legislation in which technical expertise relating to oil and gas production issues would be beneficial.

I THEREFORE MOVE that the City Council INSTRUCT the Chief Legislative Analyst to hire or retain a credible expert in petroleum and natural gas engineering or geology who can provide technical advice to the City Council and City Departments when the Council considers legislation relating to oil and gas production or conveyance in Los Angeles.
